Statement of the Case 7

How the Federal Questions Were Raised and Decided Below 12

The Federal Questions are Substantial 13

I. The judgment of the New Jersey Supreme Court presents the substantial question whether a State can unilaterally and retroactively revoke a solemn covenant it has made with holders of municipal bonds, or whether such bondholders are protected by the Contract and Due Process clauses of the United States Constitution 13

II. It is of great importance to Port Authority bondholders that this Court decide that the repealer is unconstitutional, thus returning the security provided by the Covenant and restoring the market for the bonds 15

III. The court below erroneously justified the violation of the impairment provisions of the Constitution by terming the retroactive repeal of the 1962 Covenant an exercise of the police power 18

IN THE

Supreme Court of the United States

OCTOBER TERM, 1975

No.

UNITED STATES TRUST COMPANY OF NEW YORK, as Trustee for The Port Authority of New York and New Jersey Consolidated Bonds, Fortieth and Forty-First Series, on its own behalf and on behalf of all holders of Consolidated Bonds of The Port Authority of New York and New Jersey and all others similarly situated,

Appellant,

v.

THE STATE OF NEW JERSEY, BRENDAN T. BYRNE, Governor of the State of New Jersey, and WILLIAM F. HYLAND, Attorney General of the State of New Jersey,

Appellees.

ON APPEAL FROM THE SUPREME COURT OF NEW JERSEY

JURISDICTIONAL STATEMENT

Appellant appeals from the judgment of the Supreme Court of New Jersey, entered on February 25, 1976, affirming the decision of the Superior Court of New Jersey, Law Division, Bergen County, and submit this Statement to show that the Supreme Court of the United States has jurisdiction of the appeal and that substantial federal questions are presented.

Opinions Below

The decision and opinion of the Supreme Court of New Jersey is reported at 69 N.J. 253, 353 A.2d 514 (1976), and is set forth in Appendix A hereto at pages A1-A39. The decision and opinion of the Superior Court of New Jersey, Law Division, Bergen County, is reported at 134 N.J. Super. 124, 338 A.2d 833 (Super. Ct. 1975), and is set forth in Appendix A hereto at pages A40-A110.

Jurisdiction

Appellant initiated this action in the Superior Court of New Jersey, Law Division, Bergen County, pursuant to N.J.R.S. §§ 2A:16-50 *et seq.*, seeking a declaration that Chapter 25 of the Laws of New Jersey of 1974 contravened the Contract and Due Process Clauses of the United States and New Jersey Constitutions. Chapter 25 retroactively repealed that part of the New Jersey Legislation enacted in 1962 (N.J.R.S. § 32:1-35.55(b)) which had embodied a statutory covenant (the "1962 Covenant")* between the States of New Jersey and New York and with the holders of Consolidated Bonds of the Port Authority of New York and New Jersey (the "Port Authority"). The 1962 Covenant specifically limited the involvement of the Port Authority's revenues and reserves in the area of deficit rail mass transit.

After a trial in February 1975, narrowly limited to the issues of bondholder reliance on the 1962 Covenant and the extent of the damage to the secondary bond market caused by the repeal, the Superior Court entered an order on May

* Due to the bi-state nature of the Port Authority, valid action by both States was necessary to repeal retroactively the 1962 Covenant. On June 15, 1974, New York passed legislation similar to Chapter 25 (Ch. 993, Laws of New York of 1974).

14, 1975 dismissing Appellant's complaint and declaring that Chapter 25 was constitutionally valid. Appellant appealed that decision directly to the Supreme Court of New Jersey which, on February 25, 1976, affirmed the lower court's judgment, *per curiam*. The Notice of Appeal to this Court was timely filed in the Supreme Court of New Jersey on May 14, 1976.

Jurisdiction of this Court is invoked pursuant to 28 U.S.C. § 1257(2), this being an appeal from a final judgment of the Supreme Court of New Jersey, the highest court of that State, holding that Chapter 25 of the Laws of New Jersey of 1974 is not repugnant to Article I, Section 10, Clause 1 of, or the Fifth and Fourteenth Amendments to, the United States Constitution.

The Related Case. We call the Court's attention to the pendency of a related action, *United States Trust Company of New York* v. *The State of New York, et al.,* Index No. 09128/74, in the Supreme Court of New York, County of New York, instituted on June 17, 1974. The New York case attacks the validity of New York's repeal of the 1962 Covenant on the grounds that it violates the United States and New York Constitutions. If Appellant succeeds in the New York action, the 1962 Covenant will remain in force, since valid bi-state legislation is required for effective repeal. Thus a final judgment in Appellant's favor in a New York court, not appealed, or not appealable*, would end this case notwithstanding the New Jersey courts' approval of the repeal.

---

* Such a judgment, if decided upon the adequate and independent state ground that the repeal violated the Due Process Clause of the New York Constitution, would probably not be appealable to this Court, *e.g., Jankovich* v. *Indiana Toll Road Comm'n,* 379 U.S. 487 (1965); *Herb* v. *Pitcairn,* 324 U.S. 117 (1945).

The pendency of the New York action does not affect the quality of the New Jersey Supreme Court's decision as a "final judgment . . . by the highest court of a state" under 28 U.S.C. § 1257(2).* It does not affect the power of this Court summarily to reverse the New Jersey Supreme Court's decision and thus finally settle the entire controversy, a course of action for which there are compelling arguments.

This Court, on the other hand, could decide in its discretion to note probable jurisdiction in this case and defer consideration on the merits pending final disposition of the New York case. It is not unknown, of course, for this Court to hold a case as to which it has noted probable jurisdiction on its docket pending further proceedings elsewhere. See *Metlakatla Indian Community, Annette Island Reserve* v. *Egan,* 363 U.S. 555 (1960) (involving "highest court of a state" segment of Section 1257. Similar deferrals have occurred when this Court's original or *certiorari* jurisdiction has been invoked. See, *e.g., Arkansas* v. *Texas,* 346 U.S. 368 (1953) (original jurisdiction), and, as to *certiorari,* the cases discussed in R. Stern & E. Gressman, *Supreme Court Practice* § 5.9, at p. 219 (4th ed. 1969).

The arguments for a noting of probable jurisdiction and subsequent deferral are two-fold:

> 1. If the New York court declares the New York repeal legislation repugnant to the New York Constitution, that decision is probably not appealable to this Court, since there would be an "adequate and independent state ground" for it. *E.g., Jankovich* v. *Indiana Toll Road Comm'n,* 379 U.S. 487 (1965);

* *E.g., Largent* v. *Texas,* 318 U.S. 418 (1943), and *Bandini Petroleum Co.* v. *Superior Court,* 284 U.S. 8 (1931), which held that the possibility of a controlling decision in a subsequent or distinct action, or one collateral in nature, will not cause an appeal to be non-final and thus unreviewable.

Herb v. *Pitcairn,* 324 U.S. 117 (1945). Since valid bi-state legislation is necessary for repeal, it would then not be necessary for this Court to decide the case at bar.

2. If the New York court declares the New York repeal legislation constitutional, or unconstitutional because repugnant to the United States Constitution, this Court will then be in a position to decide the entire controversy having had the benefit of the New York courts' consideration of the factual issues.

Questions Presented

1.

Is the 1974 New Jersey statute repealing retroactively the 1962 Covenant between the States of New Jersey and New York and with Port Authority bondholders, upon which holders of over $1,600,000,000 of Port Authority bonds relied, repugnant to Article I, Section 10, Clause 1 of the United States Constitution on the ground that such repeal impaired an obligation of contract?

2.

Is the 1974 New Jersey statute repealing retroactively the 1962 Covenant between the States of New Jersey and New York and with Port Authority bondholders, which conferred a valuable and substantial security right upon the holders of over $1,600,000,000 of Port Authority bonds, repugnant to the Fifth and Fourteenth Amendments to the United States Constitution on the ground that such repeal constituted a taking of property for public use without just compensation and without due process of law?

3.

Can the 1974 New Jersey statute which repealed the 1962 Covenant between the States of New Jersey and New York and with Port Authority bondholders, which was arbitrarily adopted without any legislative hearing or debate, with no mention whatsoever of any kind of an emergency, and which in fact was not related to any emergency, and which is repugnant to Article I, Section 10, Clause 1 of the United States Constitution and the Fifth and Fourteenth Amendments thereto, be upheld two years later by a court finding that it represented a valid exercise of the State's police power by reason of the coincidental existence of an emergency to which the legislature made no reference?

Constitutional and Statutory Provisions Involved

The Constitutional provisions which Appellant contends have been violated by the retroactive repeal of the 1962 Covenant are Article I, Section 10, Clause 1 of the United States Constitution, commonly known as the "Contract Clause", which provides in part as follows:

> "No State shall . . . pass any . . . Law impairing the Obligation of Contracts . . ."

and the following clauses of the Fifth and Fourteenth Amendments, respectively:

> "No person shall . . . be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation", and
>
> "nor shall any State deprive any person of life, liberty, or property, without due process of law. . . ."

This case also involves N.J.R.S. § 32:1-35.55(b), the 1962 Covenant, set forth at pages B1-B4 of Appendix B, and Chapter 25 of the Laws of New Jersey of 1974, the retroactive repealer, set forth at pages B5-B6 of Appendix B.

Statement of the Case

Appellant instituted this action in three capacities: (1) as trustee for the holders of $200,000,000 of Port Authority Consolidated Bonds, (2) on its own behalf as holder of almost $100,000,000 of Port Authority Consolidated Bonds in trust and other fiduciary accounts and (3) on behalf of the holders of the over $1,600,000,000 outstanding Consolidated Bonds. The action seeks a declaratory judgment that Chapter 25 of the Laws of New Jersey of 1974, which unilaterally and retroactively cancelled a statutory covenant between the States of New York and New Jersey and with holders of Consolidated Bonds of the Port Authority, violates the United States Constitution.

The Port Authority was established in 1921 by a bi-state Compact as a financially independent authority to accomplish public purpose projects with funds contributed by private investors. The Port Authority was created to deal with the commercial needs of the Port of New York—the handling, distribution and transportation not of persons but of freight and cargo by rail, ship and motor truck. (Ch. 130, Laws of New Jersey of 1917). With only the support of a modest initial appropriation, the two States dedicated themselves in their Compact to the "encouragement of the investment of capital" in the Port Authority to finance those projects authorized for Port Authority development. Financing for these purposes was to be accomplished by giving the Port Authority power to mortgage its facilities

and to pledge the revenues from such facilities to secure the payment of bonds issued to private investors.

Port Authority Consolidated Bonds are not general obligations of the State of New Jersey or the State of New York. They are not backed by the general revenues of either State, are not guaranteed by either State and are not supported by any grant of either State's power to tax. Accordingly, the Port Authority throughout its history, until 1962, would only undertake projects which it believed would eventually contribute net revenues for the repayment of its bonds and was required by its creditors to enter into various contractual undertakings, to which the States often were parties, to protect the revenues and reserves pledged to bondholders.

In the early 1960's, it was proposed that, for the first time in its history, the Port Authority be directed to assume financial responsibility for a facility expected to require enormous capital expenditures and to sustain perpetual operating deficits. This was the Hudson & Manhattan Railroad, a privately owned interstate electric commuter railroad system then linking Manhattan, Newark and Hoboken. The takeover of the Hudson & Manhattan by the Port Authority was proposed at a time when the four commuter railroads operating in Northern New Jersey were sustaining total passenger operating deficits of almost $60,000,000 annually, the New York commuter railroads operating deficits of between $10,000,000 and $15,000,000 annually, and the New York City transit system operating deficits of $20,000,000 annually, exclusive of debt service charges of $87,000,000.

Of the several commuter rail systems serving the Port District, the financial prospects of the Hudson & Manhattan were by far the worst. It had been in reorganization for many years, and in 1959 the bankruptcy court approved a plan which left the railroad with enough cash to continue

operations for only two years, with no funds for capital expenditures. *In re Hudson & Manhattan R.R.,* 174 F.Supp. 148 (S.D.N.Y. 1959), *aff'd sub nom., Spitzer* v. *Stichman,* 278 F.2d 402 (2d Cir. 1960).

In 1961, the New York State legislature enacted legislation directing the Port Authority to take over and operate the Hudson & Manhattan, with no limitation on the agency's future involvement in deficit rail mass transit.*

The New Jersey legislature did not concur. In spite of the fact that there were other financial tests, undertakings and provisions for bondholder protection then in effect relating to Consolidated Bonds, the New Jersey legislative committee which had been conducting hearings on the matter concluded that the Port Authority could only hope to borrow the funds necessary to take over the Hudson & Manhattan if the States agreed to limit, by a "constitutionally-protected" statutory covenant, the extent of the future involvement of the agency in the enormous deficits incurred by the area's commuter rail systems.** New York concurred and the legislation adopted was the 1962 covenant, which provides in part:

> "The 2 States covenant and agree with each other and with the holders of any affected bonds, as hereinafter defined, that so long as any of such bonds

* In response to this 1961 New York legislation, Appellant, then the largest single holder of Port Authority Consolidated Bonds, immediately stopped purchasing such bonds and adopted a policy of replacing its holdings of Port Authority Bonds. Upon the adoption of the 1962 Covenant, Appellant again began purchasing Consolidated Bonds for its fiduciary accounts, increasing its holdings to over $96,000,000 at the time the Covenant was retroactively repealed.

** As the Superior Court found: "the Legislature of 1962 concluded that it was necessary to place a limitation on mass transit deficit operations to be undertaken by the Authority in the future so as to promote continued investor confidence in the Authority." A90.

> remain outstanding and unpaid and the holders thereof shall not have given their consent as provided in their contract with the port authority, . . . (b) neither the States nor the port authority nor any subsidiary corporation incorporated for any of the purposes of this act will apply any of the rentals, tolls, fares, fees, charges, revenues or reserves, which have been or shall be pledged in whole or in part as security for such bonds, for any railroad purposes whatsoever other than permitted purposes hereinafter set forth. . . ."

The 1962 Covenant accomplished its purpose. On September 1, 1962, the Port Authority took over the Hudson & Manhattan through its PATH subsidiary, obtaining the funds necessary for the acquisition and modernization of the railroad by the successful sale of bonds to private investors. In fact, in 1962 and 1963, when the value of the Covenant was fresh in the minds of the legislators, the two States joined in a most vigorous defense of the legislation embodying the Covenant which finally resulted in a decision on the merits by this Court that the constitutional attacks on the validity of such legislation did not present any substantial Federal question. *Courtesy Sandwich Shop* v. *Port of New York Authority,* 12 N.Y. 2d 379, *appeal dismissed,* 375 U.S. 78, *rehearing denied,* 375 U.S. 960 (1963). Notwithstanding the fact that every other major commuter rail system in the Port District (Penn Central, Erie Lackawanna, Central Railroad of New Jersey) passed through bankruptcy proceedings, private investors, knowing of the protection of the 1962 Covenant against unlimited involvement of pledged revenues and reserves in deficit rail mass transit,* continued to purchase Port Authority Consoli-

* The Covenant was described in detail in *every* Official Statement following the date of its enactment, in the Port Authority's Annual Reports, and in Information Sessions held by the agency and its underwriters to acquaint prospective investors with the investment merits of Consolidated Bond offerings.

dated Bonds on favorable terms through the 1960's and early 1970's.

In 1973, in connection with proposed PATH rail extensions to Kennedy Airport in New York and to suburban New Jersey, the two States, after extensive hearings, adopted legislation *prospectively* repealing the 1962 Covenant. By this action, the States in effect reaffirmed the Covenant's protection for the over $1,400,000,000 in outstanding bonds by refusing to repeal the Covenant retroactively with respect to such bonds.* (Ch. 1003, Laws of New York of 1972; Ch. 318, Laws of New York of 1973; Ch. 208, Laws of New Jersey of 1972). In the spring of 1974, fulfilling a campaign promise, newly-elected Governor Byrne of New Jersey pushed through legislation to cancel the Covenant unilaterally and retroactively with respect to outstanding Consolidated Bonds. In marked contrast to the extensive hearings, reports and findings surrounding the enactment of the Covenant in 1962 and its prospective repeal in 1973, no hearings were held, no alternatives were examined, and bondholders were not notified of the pending legislation. At no time, either upon the passage of the bill or upon the signing of it by the Governor, was there any mention of any emergency caused by the gas shortage or air pollution or anything else. The companion legislation in New York was adopted following a brief legislative colloquy in which it was inferred that the Port Authority's Consolidated Bonds were guaranteed by both States. In fact, of course, they are not.

---

* Since bonds protected by the Covenant remained outstanding, the Covenant's protection continued in fact for bonds of series issued after the prospective repeal until the maturity or earlier redemption of the protected bonds.

How the Federal Questions Were Raised and Decided Below

Appellant in its Complaint asserted that the retroactive repeal of the 1962 Covenant constituted an impairment of the contract between the two States and with the bondholders in violation of the Contract Clause of the United States Constitution and that such repeal constituted a taking of the bondholders' property in violation of the Fifth and Fourteenth Amendments to the Constitution.

The Superior Court held that: "the repeal legislation was a reasonable and hence valid exercise of the states' police power which is not prohibited by the Contract Clause of either the Federal or the State Constitution." (A109). In a footnote, that court stated that it would not consider Appellant's arguments based on the Fifth and Fourteenth Amendments since, to the extent that claim was based on a decline in the price of the bonds in the secondary market for the bonds it was factually rejected and, in any event, the test of Constitutional validity as applied to repeal legislation is the same under both the Contract and the Due Process Clauses. (A94 n.36).

The Superior Court then entered an order dismissing Appellant's complaint and ordering judgment in favor of defendants on that portion of their counterclaim which sought a declaratory judgment that Chapter 25 was constitutional.

On appeal, the Supreme Court of New Jersey affirmed "substantially for the reasons set forth in the opinion [below]". (A4).*

---

* On December 10, 1974, the Superior Court ordered that an existing action in which Appellant had intervened, *Gaby* v. *The Port of New York Authority, et al.,* be consolidated with Appellant's action for certain limited purposes. At issue in *Gaby* was the Constitutional validity of the 1962 Covenant. In view of the decision as to the validity of the retroactive repeal of the Covenant, the *Gaby* case was dismissed by the Superior Court, the dismissal was affirmed by the Supreme Court of New Jersey and the case will not be further discussed hereafter.

The Federal Questions Are Substantial

I

The judgment of the New Jersey Supreme Court presents the substantial question whether a State can unilaterally and retroactively revoke a solemn covenant it has made with holders of municipal bonds, or whether such bondholders are protected by the Contract and Due Process clauses of the United States Constitution.

The States of New Jersey and New York passed legislation in 1962 whereby they promised that if the investing public would continue to put its money into Port Authority Consolidated Bonds to enable the Port Authority to take over and operate the Hudson & Manhattan Railroad and to build the World Trade Center, neither they nor the Port Authority would apply any of the revenues or reserves pledged as security for those bonds for any railroad purposes whatsoever other than permitted purposes defined in the legislation. As stated above, in 1962 the four Northern New Jersey commuter lines, the New York commuter railroads and the New York City transit system were showing annual operating deficits of about $60,000,000, $10,000,000 to $15,000,000, and $20,000,000 respectively. To protect the bondholders by preventing pledged revenues and reserves from being consumed by these appalling and inevitable deficits was no idle promise. It was a promise which was absolutely necessary in order to induce the investing public into continuing to buy Consolidated Bonds. It was a promise which was absolutely repudiated without any hearing or any debate by the New Jersey legislature. Is it any wonder that the entire investing public and, in particular, the municipal bond market is waiting for this Court to tell them whether they can rely upon the pledged word of a

State—whether a State will be permitted under the United States Constitution to make a promise to entice investment in municipal bonds and then repudiate it when it serves its purpose so to do?

During the trial below, representatives of each of the four principal areas of the municipal bond industry* testified without contradiction that the secondary market for Port Authority Consolidated Bonds had been dramatically disrupted by the retroactive repeal of the Covenant. A dealer in the bonds testified that in relation to bonds of comparable quality and maturity Port Authority Bonds had fallen by 6 to 12 points, or $60 to $120 per $1,000 principal amount, as a direct result of the retroactive repeal of the Covenant. There was also uncontroverted testimony with respect to the value of the 1962 Covenant as a security device not duplicated by other contractual undertakings with bondholders.**

The witnesses at the trial below also testified without contradiction regarding the effect of the retroactive repeal of the 1962 Covenant on the market for municipal bonds issued by New Jersey and New York. Purchasers of municipal bonds represent perhaps the most conservative of investors, willing to sacrifice higher yields because of the tax benefits attendant upon this type of obligation, the almost absolute assurance of repayment and, in the mean-

* Investment banking (John F. Thompson of W. H. Morton Division of American Express Company and Lester Murphy of Barr Brothers), investment advisory (John F. Thompson), dealers (Lester Murphy and Austin Fitzgerald of Weedon & Co.) and institutional investors (Gordon Fowler of Connecticut General Life Insurance Company).

** The Covenant's unique value as a security device is demonstrated by the fact that, promptly following the decision of the New Jersey Supreme Court below, the two states announced that the Port Authority would be required to give to each state $120 million, a total of $240 million, for mass transit purposes.

time, the assurance of a liquid investment. Purchasers of municipal bonds finance public purpose projects from fire trucks to airports, all upon the market's understanding that the contractual undertakings between issuers and private investors are inviolate. Thus, the witnesses below testified that many institutional investors, as a result of the retroactive repeal of the 1962 Covenant, simply crossed New York and New Jersey obligations entirely off their lists, undoubtedly contributing to the dire financial situation in which New York City and New York State are presently enmeshed.

This Court should hear this appeal in order finally to determine whether the promises made by States to the creditors of state agencies mean what they say or whether they are subject to arbitrary unilateral cancellation whenever the Legislatures believe that course to be politically expedient.

II

It is of great importance to Port Authority bondholders that this Court decide that the repealer is unconstitutional, thus returning the security provided by the Covenant and restoring the market for the bonds.

The Superior Court found* that bondholders' reliance on the Covenant was not the "primary consideration" for the purchase of their bonds. The Superior Court said: "no

* This Court is not bound by the Superior Court's factual findings. This appeal involves "a conclusion of law as to a Federal right and a finding of fact . . . so intermingled as to make it necessary, in order to pass upon the Federal question, to analyze the facts." *Fiske* v. *Kansas,* 274 U.S. 380, 385 (1927); *see also Kern-Limerick, Inc.* v. *Scurlock,* 347 U.S. 110, 121 (1954) (" . . . the long course of judicial construction . . . establishes as a principle that the duty rests on this Court to decide for itself facts or constructions upon which federal constitutional issues rest.")

witness testified that purchases would *not* have been made without the covenant,* but only that they would not have purchased or recommended the purchase of the bonds 'at the price which they were then offered' ". (A91). To say that bondholders would not have purchased the bonds on the proffered terms absent the Covenant is to say that bondholders would not have purchased the bonds at all absent the Covenant, since investors were not offered a bond at one interest rate with the Covenant's protection and another bond at a much higher interest rate without it. They were offered a package and each witness below testified that neither they nor their customers were interested in the package without the Covenant.

The court below implied that bondholders should be satisfied with the contractual protections which preceded the adoption of the Covenant, since Port Authority bonds in fact were purchased before the enactment of the Covenant. This is a tempting fallacy but a fallacy nonetheless. Prior to the Covenant's enactment, the power of the States to direct the Port Authority into any perpetual deficit undertaking was only theoretical since the necessary private financing would never have been forthcoming on acceptable terms. When it became apparent that the States intended to change the agency's course and direct it into a field inherently incapable of profitable operation, then and only then were the existing statutory and contractual protections for bondholders wholly inadequate. Then and

* This statement by the Superior Court is inaccurate. John F. Thompson, the dean of municipal bond analysts, testified in part:

> "Q. If you knew that the covenant would later be repealed would you have recommended the Port Authority bonds during the '60s?
>
> "A. No." (T 86-14 to 17).

only then did some reasonable financial limitation become an absolute *sine qua non* of future Port Authority Consolidated Bond financing on reasonable terms. The 1962 Covenant was the limitation agreed upon by the States.

Similarly, the Superior Court required proof of "permanent" secondary market damage as a result of the repeal. That proof is in the record—the very recovery in the bonds which the Superior Court relied upon to support its conclusion that damage was not "permanent" was explained as a short-term technical adjustment in the market prompted by purchases to cover short sales in the closing months of the preceding year. Further, after the retroactive repeal the market for Port Authority bonds became "extremely thin" and "sensitive" so that a sale of a large block of the bonds could not be made at the current bid price but only at a price substantially below it. The Superior Court found no significance in this market disruption or in a market decline of 6 to 12 points (some $60 to $120 per $1,000 principal amount of bonds) as a direct result of the Covenant's repeal, notwithstanding the fact that over $1,600,000,000 in bonds are outstanding. With respect to a single $100,000,000 issue of Consolidated Bonds this decline represents a diminution in market value of between $6,000,000 and $12,000,000. This, to the courts below, was not an impairment of constitutional proportions.

The Superior Court did concede that bondholders' security had been diminished:

> "To the extent that the repeal of the covenant authorizes the Authority to assume greater deficits for such purposes, it permits a diminution of the pledged revenues and reserves and may be said to constitute an impairment of the states' contract with the bondholders." A95.

The present planned "diminution" is $240 million, with no assurance to bondholders that this is not just the beginning. The possibility of such increasing diversions, to the courts below, was not an impairment of constitutional proportions.

III.

The court below erroneously justified the violation of the impairment provisions of the Constitution by terming the retroactive repeal of the 1962 Covenant an exercise of the police power.

The 1962 Covenant is the clearest possible example of a contract made by a State with certain of its citizens. The opening words of the Covenant read: "The 2 States covenant and agree with each other and with the holders of any affected bonds. . . ." Such a contract must be secure against impairment under the Contract Clause of the United States Constitution and, since a property right is created, protected by the Federal Due Process Clause. A95 n.38; see *Indiana* v. *Brand,* 303 U.S. 95, 100 (1938); *New Jersey* v. *Yard,* 95 U.S. 104 (1877). It was passed only following exhaustive legislative hearings and was enacted as a bargained-for "constitutionally-protected" (in the words of the New Jersey legislative committee) statutory covenant.

The Superior Court's holding that the repeal was constitutional, notwithstanding the conceded impairment, is based on an erroneous application of language derived from *W. B. Worthen Co.* v. *Kavanaugh,* 295 U.S. 56 (1935). The Superior Court stated the test of constitutionality as follows:

> "Conceding the existence of some impairment of bondholder security as a result of the repeal, has

> the action of the states destroyed the quality of their security as an 'acceptable investment for a rational investor'?" A107-A108.

It is from *Kavanaugh* that the Superior Court adopted its test of constitutionality. 295 U.S. at 60. The Superior Court, however, misread the holding in *Kavanaugh.* This Court held there that in enacting the challenged legislation the legislature had "put restraint aside" and "with studied indifference to the interests of the mortgagee or to his appropriate protection they have taken from the mortgage the quality of an acceptable investment for a rational investor." *Id.* This Court specifically noted that the changes wrought by the challenged legislation were so substantial that the State had transgressed the "outermost limits" of constitutional bounds:

> "In the books there is much talk about distinctions between changes of the substance of the contract and changes of the remedy. . . . The dividing line is at times obscure. There is no need for the purposes of this case to plot it on the legal map. Not even changes of the remedy may be pressed so far as to cut down the security of a mortgage without moderation or reason or in a spirit of oppression. Even when the public welfare is invoked as an excuse, these bounds must be respected. . . . *We state the outermost limits only. In stating them we do not exclude the possibility that the bounds are even narrower.* The case does not call for definition more precise. A catalogue of the changes imposed upon this mortgage must lead to the conviction that the framers of the amendments have put restraint aside. With studied indifference to the interests of the mortgagee or to his appropriate protection they have taken from the mortgage the quality of an acceptable investment for a rational investor." *Id.* (emphasis added).

Thus, although in *Kavanaugh* the Court was careful to state that the destruction of the quality of the security "as an acceptable investment for a rational investor" constituted the "outermost limits" of the bounds of which a state may not transgress, the Superior Court adopted these outer limits as its standard for determining the constitutionality of the 1974 repeal legislation. The Superior Court has turned what to this Court was an unconstitutional maximum into a required minimum.

If only those acts of the State which resulted in the destruction of a contract as an acceptable investment were constitutionally impermissible, then virtually no covenant or combination of covenants in a bond resolution or statute would be safe from abrogation. There are, after all, innumerable covenants and provisions in bond resolutions and statutes, the abrogation of which would not "destroy" the bond's security, but which obviously would result in a material impairment.

Additionally, the Superior Court erroneously held:

> "The line of demarcation between *Blaisdell* and *Kavanaugh* may be expressed as one of degree: The states' inherent power to protect the public welfare may be validly exercised under the Contract Clause even if it impairs a contractual obligation so long as it does not destroy it." A102.

The Superior Court concluded that the framers of the Constitution of the United States meant "destroy" when they said "impair." *Home Bldg. & Loan Ass'n* v. *Blaisdell,* 290 U.S. 398 (1934), certainly does not support this extreme view, since it merely involved a postponement of remedies for a short period of time.

In reaching its conclusion that the retroactive repeal of the 1962 Covenant was "a reasonable and hence valid exercise" of the police power, the Superior Court found:

> "Suffice it to say that between 1962 and 1974 the security afforded bondholders had been substantially

> augmented by a vast increase in Authority revenues and reserves, and the Authority's financial ability to absorb greater deficits, from whatever source and without any significant impairment of bondholder security, was correspondingly increased. During the same interval mass transit facilities within the District continued to deteriorate while the public need for such facilities became unprecedented as the result of the promulgation of stringent federal air pollution regulations designed to reduce automobile usage and the emergence of an energy crisis which threatened the entire system of private automobile transportation in the two States." A106-A107 (footnotes omitted).

The Superior Court's first conclusion, that the Port Authority's ability to absorb deficits has greatly increased, is simply inaccurate. Its second conclusion, that mass transit facilities would decline while public need increased, was fully contemplated in 1962.

While the Port Authority's revenues greatly increased in the 1960's and early 1970's so did its expenses and reserve requirements, so much that the actual surplus revenues of the Port Authority in excess of mandated reserves increased only $2,718,000 in the 13 years from the enactment of the Covenant to its retroactive repeal, while, during the same period, the principal amount of outstanding Consolidated Bonds increased from approximately $690,000,000 to over $1,600,000,000.

The alleged improvement in the Port Authority's financial position cannot justify repeal of the Covenant, even if it existed. If it could, then any contractual undertaking with bondholders, if effective in contributing to an improvement in the obligor's financial well-being, would be subject to arbitrary cancellation. Surely it takes more to justify the State in abrogating its promise!

The pressing need for rail mass transit facilities in the Port District was the very reason the Covenant was

enacted—to enable the Port Authority to take over the destitute Hudson & Manhattan, while maintaining investor confidence in light of the certainty that rail mass transit systems would continue to decline financially.

The Superior Court based primary reliance on this Court's decision in *City of El Paso* v. *Simmons*, 379 U.S. 497 (1965). *El Paso*, a case dealing with squatters' rights in Texas, is clearly distinguishable.

Briefly stated, the facts in *El Paso* were as follows: In 1910, the State of Texas sold public land to plaintiff's predecessor in title in accordance with a State policy of selling such lands to raise funds for public schools. The purchase money mortgage contract was extremely favorable to the purchaser and, in practice, the time for payment of principal was periodically extended and, in fact, was never called due. The State retained a right of forfeiture if the owner failed to pay interest, but the owner or his vendees were entitled to reinstatement, provided no rights of third persons had intervened. The right to reinstatement was therefore defeasible and the State always had pursued a policy of quick resale of the forfeited lands to a third party, thus cutting off the right to reinstatement. In 1941, legislation was enacted providing that the right of reinstatement had to be exercised within five years from the date of forfeiture or the effective date of the act, whichever was later. Plaintiff, who filed his application for reinstatement more than five years after the date of forfeiture, filed suit to determine title to the land, claiming that the 1941 legislation violated the Contract Clause.

The narrow exception to the rule that a State may not repudiate its contractual undertakings which was established in *El Paso* has no application to the repeal of the 1962 Covenant. Unlike *El Paso*, here the State has many

alternatives* to deal directly or indirectly with the requirements for commuter rail mass transit. Here the repudiated obligation was in fact a substantial inducement to private investors lending their funds to an agency of the State. To argue whether it was "a primary inducement" is to quibble. Suffice it to say that it was a *sine qua non* of the purchase by the bondholders of these particular Consolidated Bonds. Here the investors reasonably expected the State's obligation to endure until their bonds were satisfied. Here, rather than the dramatic change in circumstances present in *El Paso,* the very danger foreseen in 1962 and sought to be protected against by the Covenant came to pass. Here, unlike *El Paso,* if any unforeseen or unexpected benefits have been conferred they have been conferred on the State. In 1962, it was expected that the Port Authority would be taking off the States' hands in the future deficits for operating the old Hudson & Manhattan in an amount which would level off at $6,575,000 annually. In fact, those deficits now exceed $35,000,000 annually, and the States refuse to remedy the situation through fare increases. Here, unlike *El Paso,* the bondholders' contract has been totally cancelled rather than modified by some reasonable adjustment in its terms. In marked contrast, when the terms of the Triborough Bridge Authority bonds were changed to benefit mass transit, the bondholders were

---

* Several obvious alternatives are: to guarantee an issue of Port Authority bonds for mass transit purposes; to allow the Port Authority to increase PATH fares to competitive levels, thus freeing more funds for railroad purposes under the Covenant's formula; to issue State bonds and simply utilize the Port Authority's operating expertise; or to refund outstanding bonds protected by the Covenant and secure bondholder consent under those issues not yet refundable. These alternatives demonstrate that this case does not involve any lofty governmental purpose. Rather, it involves money, and only money, a desire by the State to further lessen government expenditures. This has never been sufficient to justify the cancellation of a State's contract. *E.g., Lynch* v. *United States,* 292 U.S. 571, 580 (1934).

consulted and consented to the change after obtaining an increase in the interest rate. *El Paso,* therefore, is distinguishable from this case upon every ground on which that decision was based. This case presents the clearest example of an unconstitutional impairment of contract and a taking of bondholders' property without just compensation and without due process of law.

Conclusion

This Court should reverse the judgment of the Supreme Court of New Jersey or, in the alternative, note probable jurisdiction of the appeal and, if the Court deems it appropriate, order the appeal deferred pending resolution of the related action in New York.

APPENDIX A

Decision of the Supreme Court of New Jersey

UNITED STATES TRUST COMPANY OF NEW YORK, AS TRUSTEE FOR THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY CONSOLIDATED BONDS, FORTIETH AND FORTY-FIRST SERIES; ON ITS OWN BEHALF AND ON BEHALF OF ALL HOLDERS OF CONSOLIDATED BONDS OF THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY AND ALL OTHERS SIMILARLY SITUATED, PLAINTIFF-APPELLANT-CROSS-RESPONDENT, v. THE STATE OF NEW JERSEY; BRENDAN T. BYRNE, GOVERNOR OF THE STATE OF NEW JERSEY; AND WILLIAM F. HYLAND, ATTORNEY GENERAL OF THE STATE OF NEW JERSEY, DEFENDANTS-RESPONDENTS-CROSS-APPELLANTS.

DANIEL M. GABY, PLAINTIFF-CROSS-APPELLANT, v. THE PORT OF NEW YORK AUTHORITY, JAMES C. KELLOGG, III, HOYT AMMIDON, GUSTAVE L. LEVY, JAMES G. HELLMUTH, ANDREW C. AXTELL, WILLIAM J. RONAN, W. PAUL STILLMAN, WALTER H. JONES, BERNARD J. LASKER, PHILIP B. HOFFMAN, AND JERRY FINKELSTEIN, COMMISSIONERS OF THE PORT OF NEW YORK AUTHORITY, AUSTIN J. TOBIN, EXECUTIVE DIRECTOR OF THE PORT OF NEW YORK AUTHORITY, AND WILLIAM T. CAHILL, GOVERNOR OF THE STATE OF NEW JERSEY, DEFENDANTS-CROSS-RESPONDENTS, AND UNITED STATES TRUST COMPANY OF NEW YORK, ETC., INTERVENOR.

Argued October 7, 1975—Decided February 25, 1976.

SYNOPSIS

Class action on behalf of citizens, residents and taxpayers whose occupations were dependent upon the existence of mass transportation was brought against Port Authority of New York and New Jersey challenging constitutionality of covenant between the States of New Jersey and New York on one hand and the holders of bonds issued by the Port Authority on the other hand with respect to the use to which certain revenues were to be put. After the covenant was repealed by New Jersey Legislature, trustee for the bonds brought action challenging the constitutionality of the repealing statute. The Superior Court, Law Division, 134 *N. J. Super.* 124, upheld the constitutionality of the repealer and dismissed the class action and the parties appealed. The Supreme Court held that compact which created the Port Authority empowered, but did not mandate, the Authority to develop a plan for a particular kind of method of transportation; and that, since the Authority had exercised its discretion by rejecting a policy favoring mass transportation, mandamus did not lie to compel the Authority to develop a plan for mass transit even though, by virtue of repeal of the covenant, it had the funds to do so.

Affirmed.

Pashman, J., concurred in part and dissented in part and filed an opinion.

Mr. Robert B. Meyner and *Mr. Devereux Milburn,* of the New York bar, argued the cause for appellant-cross-respondent-intervenor United States Trust Company (*Messrs. Meyner, Landis and Verdon,* and *Messrs. Carter, Ledyard and Milburn* and *Hawkins, Delafield and Wood,* of the New York bar, attorneys; *Mr. Meyner, Mr. Milburn,* and *Mr. Donald J. Robinson,* of the New York bar, on the brief and of counsel).

Mr. Murray J. Laulicht and *Mr. Michael I. Sovern,* of the New York bar, Special Counsel to the Attorney General, argued the cause for respondents-cross-appellants State of New Jersey, Brendan T. Byrne and William F. Hyland (*Mr. William F. Hyland,* Attorney General of New Jersey, attorney; *Mr. Laulicht, Mr. Sovern* and *Mr. Harold Edgar,* of the New York bar, Special Counsel to the Attorney General, on the brief).

Mr. Howard Stern argued the cause for plaintiff-cross-appellant Daniel M. Gaby (*Messrs. Shavick, Stern, Schotz, Steiger and Croland,* attorneys; *Mr. Stern* on the brief. *Mr. Stern* and *Mr. Theodore W. Kheel* of the New York bar and *Messrs. Battle, Fowler, Stokes and Kheel* of the New York bar, of counsel).

Mr. Francis A. Mulhern argued the cause for cross-respondent The Port Authority of New York and New Jersey, et al. (*Mr. Mulhern,* attorney and on the brief; *Mr. Patrick J. Falvey* of the New York bar, *Mr. Joseph Lesser* of the New York bar, *Ms. Isobel E. Muirhead, Mr. Arthur P. Berg* of the New York bar, and *Mr. Vigdor D. Bernstein,* of counsel).

PER CURIAM. The judgment is affirmed, substantially for the reasons set forth in the opinion of Judge Gelman, 134 *N. J. Super.* 124 (Law Div. 1975). The observations which follow are occasioned by Justice Pashman's suggested remedy in the Gaby suit.[1]

Whatever persuasive force might be accorded the argument that as a matter of policy the Port Authority should devote more of its energies and resources to the mass transit field, the fact remains that the remedy fashioned by our Brother is neither pressed for by Gaby on this appeal nor within the powers of this Court to direct and enforce.

Gaby's class action complaint for a declaratory judgment that the 1962 Covenant was unconstitutional asked for "multifarious relief," including a request that the Port Authority be directed "to formulate and submit to the court a plan for the development of mass transit facilities within the Port District," 134 *N. J. Super.* at 131. However, the trial judge, having concluded in the *United States Trust Co.* suit that "the repeal legislation was a reasonable and hence valid exercise of the states' police power which is not prohibited by the Contract Clause of either the Federal or the State Constitution," *id.* at 197, found it unnecessary to reach the issue of the 1962 Covenant's asserted invalidity. He therefore dis-

---

[1]Justice Pashman would order the Port Authority to complete pending projects and to "formulate and present plans and suggestions for a regional mass transportation scheme to the Legislatures of New York and New Jersey * * * in an expeditious fashion and within a fixed period of time." *Post* at 288.

missed Gaby's complaint, *id.* at 198, without discussing the requested relief of a direction for development of a mass transit plan, on which issue there was neither testimony nor argument at the trial level.

In his brief filed in the Court after direct certification of his appeal, 68 *N. J.* 175 (1975), Gaby conceded his limited purpose in pursuing the appeal as being "to preserve the issue of the constitutionality of the 1962 Covenant." The point of this in turn was, as he put it, to furnish "an alternative ground for affirming the decision below."[2] Whatever issues may have been preserved by his appeal and whatever desire there may have been to present "all the issues," the fact remains that Gaby's brief raises and discusses only the validity of the Covenant in constitutional terms. No argument is made there for any special relief; and, understandably, the Port Authority has likewise not briefed the question at all in this Court. At oral argument the subject was adverted to only in a limited fashion.

Ordinarily, we would have no occasion to decide an issue which, while portentous in itself, has become so remote and peripheral to the central thrust of this litigation. However, inasmuch as the minority opinion raises and discusses *in extenso* this question of considerable public significance, namely, the involvement of the Port Authority in mass transit and particularly the propriety of this Court ordering as a specific remedy the submission of a plan for development of mass transit facilities, we overlook whatever infirmities may exist in the record before us, compounded by the practical disadvantage of not having the views of the parties, and proceed to address the point.

[1] The 1921 Compact between the States of New York and New Jersey, whereby the Port Authority was created, *N. J. S. A.* 32:1-4, envisioned the adoption of a Comprehensive Plan for the development of the port. *N. J. S. A.*

---

[2] **Cross Motion for Certification of Plaintiff-Respondent, Daniel M. Gaby.**

32:1–11. Direction was given to the Port Authority in the Plan itself "to proceed with the development of the port of New York in accordance with said comprehensive plan * * *." *N. J. S. A.* 32:1–33. That the Authority's involvement in transportation matters was contemplated is obvious from a reading of this and other portions of the Comprehensive Plan as well as of the Compact; but it requires a quantum leap to derive therefrom a mandate (as distinguished from the power) to develop a plan for a particular kind or method of transportation, to wit, mass transit. It is not without significance, for instance, that the legislature has provided that the Authority *may* make recommendations for the increase and improvement of transportation facilities, *N. J. S. A.* 32:1–13, which by definition includes railroads and any facility for the "transportation or carriage of persons or property," *N. J. S. A.* 32:1–23; but nowhere is it mandated that such recommendations be made. A mandate such as that contemplated by the minority opinion is not something to be inferred by the courts but rather is a singularly appropriate subject for specific legislative directive, conspicuously absent here. *Cf. Del. Riv. & Bay Auth. v. N. J. Pub. Emp. Rel. Comm'n.,* 112 *N. J. Super.* 160, 165 (App. Div. 1970), aff'd o. b., 58 *N. J.* 388 (1971).

If, then, the Authority is in the position of being empowered (as we acknowledge) rather than mandated to act in the area of mass transit, its exercise of that power becomes a matter of discretion and judgment. As is made abundantly clear by the voluminous record in this case, the trial court's opinion, and the concurring and partially dissenting opinion here, the Authority has more than once in recent years broached the question of whether it should pursue a policy of encouraging mass transit and has determined that it shall not. The remedy suggested in the minority opinion is designed to overrule that decision. As such it is in the nature of the former prerogative writ of *mandamus,* now invocable under proceedings for relief in lieu of prerogative writs, *Rule* 4:69.

[2, 3] However, ***mandamus*** will not lie if the duty to act is a discretionary one and the discretion has been exercised. As Justice Heher explained, in *Switz v. Middletown Twp.*, 23 *N. J.* 580 (1957), ***mandamus*** is "a coercive process that commands the performance of a specific ministerial act or duty, or compels the exercise of a discretionary function, but does not seek to interfere with or control the mode and manner of its exercise or to influence or direct a particular result." 23 *N. J.* at 587. As we have sought to demonstrate, the circumstances before us do not at all invite or accommodate the remedy proposed. This is so because the Authority (whose function is clearly not ministerial) has in fact exercised its discretion, even though that exercise has resulted in the rejection of a policy favoring mass transportation. Being a judgment decision its wisdom may be open to dispute; but as to the propriety of this Court's refusal to intrude on the underlying policy determination, there can be no question in the circumstances before us. And this not as a response to some procedural deficiency but because of our respect for the fundamental substantive principle embodied in *mandamus.*

Finally, we observe that in this particular area of bistate operations, there is close and continuing supervision of the Port Authority by the other branches of government. Hence, the proposed remedy would not only tend to usurp the influence over the Authority vested in the Governors of the States of New York and New Jersey, but would also intrude upon the functions of the legislatures of the respective States, whose task it is in the final analysis to enact appropriate legislation and take such other action as may be required to remedy whatever deficiencies may exist with respect to mass transit.

Affirmed.

PASHMAN, J. (concurring in part and dissenting in part).

I

INTRODUCTION TO GABY COMPLAINT

My Brothers today affirm a lower court decision which was the product of two separate and distinct actions consolidated for trial. *United States Trust Co. v. State,* 134 *N. J. Super.* 124 (Law Div. 1975). In the first action, brought by plaintiff United States Trust Company, the trial court sustained the State's repeal of the 1962 statutory covenant (*N. J. S. A.* 32:1–35.55) between the States of New Jersey and New York and the holders of bonds issued by the Port Authority of New York and New Jersey (Port Authority). That covenant was concurrently enacted by the legislatures of New York and New Jersey at the time of the Port Authority's acquisition of the Hudson & Manhattan Railroad Company (H & M), since renamed the Port Authority Trans-Hudson System (PATH). Intended as a means of protecting the bondholders' investments, the covenant prohibited the states and the Port Authority from applying "any of the rentals, tolls, fares, fees, charges, revenues or reserves, . . . for any railroad purposes whatsoever other than permitted purposes." *N. J. S. A.* 32:1–35.55. As subsequently defined in the covenant, "permitted purposes" precluded the establishment, acquisition or construction of any railroad facility until the Port Authority could determine that the facility would be self-supporting or would not produce deficits except within narrowly defined limits.

In dismissing plaintiff's cause of action, the trial court found that the 1974 "repealer," *N. J. S. A.* 32:1–35.55a, was immune from constitutional challenge as an impairment of contractual obligation, a right which is protected by *U. S. Const.,* Art. I, § X and *N. J. Const.* (1947), Art. IV, § VII, ¶ 3. As a collateral finding, the court determined that the attractiveness of Port Authority bonds was not contingent upon the continued protection of the 1962 covenant, but rather upon the viability of the Port Authority itself.

The majority affirms the trial court on these bases and to this extent, I concur fully and completely with the conclusions reached by Judge Gelman in his very enlightened and comprehensive opinion. My agreement is premised on the unduly restrictive influence which the covenant exerted on Port Authority operations in contravention of the statutory mandates upon which that agency was created in 1921. The paralytic effect of the covenant could be seen in the Authority's practical inability and attitudinal reluctance to respond to the mounting needs for rapid transit in the New York metropolitan area. In light of the limited utility which it continued to serve, the 1962 covenant represented an artificial obstacle to the affirmative public action which was necessitated as an alternative to continued and wasteful reliance solely on the private automobile as the primary mode of transportation.

The second action, *Gaby v. Port of New York Authority, et al.,* was likewise concerned with the repeal of the 1962 covenant. Expanded into a class action on behalf of citizens, residents and taxpayers whose occupations are dependent upon the existence of mass transportation, plaintiff cites the 1962 covenant as an impediment to the improvement and expansion of these facilities. While the State of New Jersey sought the repeal of the covenant as an ultimate end in the *United States Trust Co.* action, plaintiff Gaby visualizes a repeal as merely a means to a larger end. This is because the vindication of Gaby's interests is only partially dependent on freeing the financial resources from the restrictions of the 1962 covenant and placing them at the Port Authority's disposal. More problematical and essential to the relief which he desires is the necessity to overcome the administrative inertia which has characterized the agency's efforts in the area of mass transportation. Consequently, Gaby requested in his complaint that the trial court:

. . . [D]irect and order the Port Authority, its Commissioners, and its Executive Director to formulate and submit to this Court, or a Special Master to be appointed by this Court, a plan for the

development of mass transportation facilities in the Port District. . . . [Plaintiff Gaby's complaint at 17]

This action was pretried on February 22, 1973 and oral arguments were heard on September 26, 1973 on the parties' respective motions for summary judgment. Judgment was deferred and arguments were later rescheduled to permit the submission of briefs on additional issues and the intervention of United States Trust Company as a party defendant representing the interests of Port Authority bondholders. Prior to these arguments, the pendency of legislation repealing the covenant recommended that the trial court withhold further review. Accordingly, the proceedings were stayed to permit consideration of the anticipated legislation.

The statutory repealer which was signed into law by Governor Brendan T. Byrne on April 30, 1974 precipitated the *United States Trust Co.* action, which was instituted on the same day. On the basis of common subject matter, this later action was consolidated on December 10, 1974 with the previously filed *Gaby* case by order of the trial court. These matters then proceeded to trial in February 1975.

The trial was largely confined to the factual issues of bondholder reliance on the 1962 covenant and resultant damage to the secondary bond market caused by the repeal of the covenant. The information which was thus elicited formed the basis for the trial court's reported opinion, 134 *N. J. Super.* 124, in which the constitutionality of the 1974 repealer was sustained. Although reasons upon which the court's decision was grounded were clearly distinguishable from the constitutional arguments advanced by Gaby, the court's ultimate decision — the rejection of the 1962 covenant — coincided with Gaby's interests. Regardless of whether that result was achieved by sustaining the 1974 repealer as the trial court did, or whether it was achieved by finding the 1962 covenant itself unconstitutional as suggested by Gaby, the result indicated the possibility of granting the further relief sought by Gaby. A more activist role

for the Port Authority appeared to be a reality. Nonetheless, the court concurrently ordered the dismissal of Gaby's complaint, thus frustrating the additional relief which he sought. 134 *N. J. Super.* at 198. From this disposition, Gaby filed a cross-motion for direct certification which was granted on May 28, 1975. 68 *N. J.* 175 (1975).

Similar to his presentation before the trial court, Gaby's arguments are again directed towards a declaration of the unconstitutionality of the 1962 covenant. This is more the result of strategic considerations, however, than devotion to substantive principle. Recognizing the limited nature of the trial court's factual findings and disposition, Gaby has taken what appears to be a most advisable legal course. By preserving the issue of the constitutionality of the 1962 covenant on appeal, he has simultaneously preserved one of his major contentions should this or any other court reverse the trial court on the constitutionality of the 1974 repealer.

Furthermore, in his Supreme Court brief, Gaby explained that his contentions with regard to the 1962 Covenant are inextricably tied to his request for greater involvement of the Port Authority in mass transit projects:

> **The Appellant's Brief of Gaby is concerned with the validity of the 1962 Covenant (*N. J. S. A.* 32:1–35.50 *et seq.*). Central to the issue of the validity of the Covenant is the question whether the mass transportation of people within the Port District was one of the principal activities authorized by the Compact (*N. J. S. A.* 32:1–35.50 et seq.); whether the insulation of the Port Authority from that activity was in such derogation of the Compact as to frustrate its meaning and intent and so material as to require Congressional approval. [Plaintiff-Cross Appellant's brief at 3].**

The majority today chooses to overlook this relationship in its reluctance to transcend the judgmental confines of the trial court and in its affirmation of that court's dismissal of Gaby's complaint. This disposition, undertaken in an unusually cavalier fashion, is not a product of some misunderstanding as to the essential relief which Gaby requests. On the contrary, the majority recognizes the strategic con-

siderations implicit in Gaby's desire to preserve the issue of the constitutionality of the 1962 Covenant. *Ante* (at 261). Nonetheless, in characterizing the constitutional arguments raised by Gaby as exemplifying a "limited purpose in pursuing the appeal," the majority misconstrues and frustrates the true interests of Gaby, and has done so in a manner which I find most distressing.

The majority justifies its truncated consideration of Gaby's plea by referring to an isolated phrase, taken out of context from a sentence which Gaby adopted as representative of his position in his cross-motion for certification. When more appropriately considered within the sentence in which it originally appeared, the phrase — "an alternative ground for affirming the decision below" — assumes an entirely different meaning from that which the majority attaches to it:

> The purposes of this cross motion are identical with those stated by the State of New Jersey in its cross motion for certification: ". . . bring before the Supreme Court *all of the issues submitted to Judge Gelman* and to avoid the possibility that some of the issues submitted to Judge Gelman might have to be determined in the first instance by the Appellate Division. Because of the urgency and public importance of this case, it would be most unwise to require a piecemeal, appellate process, particularly since the [first] issue presented by this cross motion could be an alternative ground for affirming the decision below. . . ." [Plaintiff-cross appellant's appendix at 47a–48a; emphasis supplied].

While the "first issue" refers to the constitutionality of the 1962 covenant, I believe it would be wrong to confuse Gaby's real interest in stimulating improvement of urban mass transportation with his more temporal interest in having the 1962 covenant declared unconstitutional. The majority not only fails to make this distinction, but fails to do so despite Gaby's expressed desire to present "all of the issues" to this Court.

This failure is only compounded by the majority's persistent willingness to ignore the Gaby complaint and the relief which it warrants. In spite of plaintiff's overindulgent concern for the constitutionality issue, the statement of his case reflects

more than a limited and perfunctory reference to the subject. During the course of oral argument, counsel for Gaby specifically stated:

> **Yes, as we read the compact between the states, the affirmative obligation of the Port Authority in this area is to plan. The immediate affirmative obligation . . . and indeed in these briefs and elsewhere, there is a suggestion that if the Covenant is invalid or the repealer upheld, either way, that it would be appropriate for the Court to direct the Port Authority to study mass transit needs in the Port Authority area and make proper proposals. Then when it comes to implementation, then you're talking about legislation of the two states, but the affirmative obligation of the Port Authority is to study the problem as it affects the Port area.**

It should be noted in passing, that this statement not only affirms the relief desired by plaintiff, but also embodies a request for a remedy which parallels that which I suggest below, *infra* at 287–288.

Therefore, although my Brothers remove the constricting fiscal shackles of the 1962 covenant, they fail to take the additional steps which flow as natural concomitants to the action which they affirm. This failure, as I see it, stems, in part, from a reluctance to go farther and faster in an area plagued by administrative inaction and intransigence. It also constitutes an indulgence in the meauingless gesture of sustaining the 1974 repealer without concurrently authorizing the relief needed to implement the initiative which the Legislature sought to instill in the Port Authority by that repeal.

As I fear, the administrative foot-dragging which was implicit in the 1962 covenant, may be only symptomatic of the inertia which has characterized the Port Authority in the field of mass transit operations. The majority's decision can only serve to perpetuate this sad state of affairs.

In light of the rapidly deteriorating condition of mass transit operations in the metropolitan area, this disposition is most unfortunate. Faced with the ever-increasing deficits which are inherent in this mode of public transportation, mass transit operations have been repeatedly shunned by the Port

Authority in spite of its statutory mandate to the contrary. As cutbacks in service have been experienced throughout the Port District, the commuters' resort to the private automobile has produced a dysfunctional volume of traffic congestion and pollution. The toll which this congestion has exacted has been obvious in the tunnels and on the bridges, whose operations the Port Authority apparently prefers to maintain.

Unlike today's majority, I am unwilling to assign plaintiff Gaby's case to death or to a peaceful somnambulism. This is particularly so where within the historical and evidential materials presented to the trial court reside the seeds for a more sweeping and effective disposition. I cannot sanction the mere repeal of the 1962 covenant without a concurrent assurance that the Port Authority will assume those responsibilities for which it was created and, which to this point, it has effectively avoided. The recalcitrance of the Port Authority has not been altered by the trial court's disposition and will not be altered by merely affirming that decision. A more effective disposition is needed.

II

HISTORY OF THE OBLIGATION OF THE PORT AUTHORITY TO PROVIDE MASS TRANSIT FACILITIES

In its opinion, the majority grudgingly acknowledges the Port Authority's obligation to become involved in mass transportation. After a perfunctory reading of the statutory framework of the Port Authority, the majority concludes that the existence of such a mandate is "a singularly appropriate subject for specific legislative directive, conspicuously absent here." (At 258).

While specific statutory directives have served as vehicles for recent Port Authority projects, *N. J. S. A.* 32:1–35.20 (authorization for the Port Authority to undertake mass transportation projects to link the various airports in the Port District), *N. J. S. A.* 32:1–35.21 (authorization to

build railroad lines to and facilities at the various airports in the Port District), its employment is in its infancy and affords no insight as to the previously reluctant forays which the Port Authority has made into the field of mass transportation. A full consideration of the statutory basis of the Port Authority and the history of its implementation reveals that the majority's interpretation of the Authority's powers and obligations is both short-sighted and erroneous. For instance, the statutory creation of the Port Authority evinces a clear legislative intent to have the Authority become involved in development of mass transportation. The majority position misconceives the role of the Authority to be a drone-like entity ultimately dependent upon enabling legislation, rather than a separate bi-state agency. Similarly, the majority fails to recognize the inherent limitations on the knowledge, information and expertise which are at the disposal of the New Jersey and New York Legislatures on the subject of mass transit operations. In light of this fact, the wisdom of relying upon legislative directives to address the panoply of needs within the field of mass transportation becomes problematical. The failure of the majority to account for these factors casts a large shadow upon the validity of its construction of the Port Authority's powers. These inadequacies within the majority position become apparent upon thorough consideration of the statutory origins of the Port Authority and the mandate which was encompassed in its original Compact and Comprehensive Plan.

A. *Origins and Early Development; Compact and Comprehensive Plan*

The Port Authority is a statutory product of a compact which was entered into by the States of New Jersey and New York in 1921.[1] Modeled after the recommendations of a joint

[1]New Jersey approved the compact by *L.* 1921, *c.* 151, now contained in *N. J. S. A.* 32:1-1 *et seq.* The comparable New York

commission,[2] the Port Authority represented a response to the dysfunctional competition and commercial disputes which historically had plagued the two states.[3] As such, it was intended to meet the needs and interests which the two states shared with respect to the Port of New York. This was expressly recognized in the preamble to the 1921 Compact, which stated:

> The future development of such terminal, transportation and other facilities of commerce will require the expenditure of large sums

---

legislation was adopted in *Laws of New York* 1921, *c.* 154, now contained in *N. Y. Unconsol. Laws*, § 6401 *et seq.* (McKinney 1961). Congressional consent to the compact was granted by *Pub. Res. No.* 17, *S. J. Res.* 88, *c.* 77, 42 Stat. 174.

At the time of creation, the agency was designated "The Port of New York Authority." *N. J. S. A.* 32:1-4. This was amended by *L.* 1972, *c.* 69, §§ 1, 2, contained in *N. J. S. A.* 32:1-4 and 32:1-4.1, to the more ecumenical "The Port Authority of New York and New Jersey." For the purposes of this opinion, the agency shall be referred to as the Port Authority or just Authority.

[2]The New York, New Jersey Port and Harbor Development Commission was a body whose representative membership were created by independent, though concurrently enacted bills which were passed by the Legislatures of New Jersey and New York in 1917. Composed of three commissioners from each state, the commission issued a preliminary report in 1918, New York, New Jersey Port and Harbor Development Comm'n, *Preliminary Joint Report, Transmitted to the Legislature*, February 18, 1918 (1918). This was followed by a progress report in 1919, and a comprehensive report in 1920, in which the commission proposed the establishment of a permanent body with interstate jurisdiction. *Joint Report with Comprehensive Plan and Recommendations* (1920). It subsequently submitted the tentative draft of the proposed compact. See *Bard, The Port of New York Authority*, 24-34 (1942).

[3]The enmity between the two states traces its roots as far back as the seminal case, *Gibbons v. Ogden*, 22 *U. S.* (9 Wheat.) 1, 6 *L. Ed.* 23 (1824). Although it has from time to time received exhaustive consideration in the case law, *New Jersey v. New York*, 28 *U. S.* (3 Pet.) 461, 7 *L. Ed.* 741 (1830); 30 *U. S.* (5 Pet.) 284, 8 *L. Ed.* 127 (1831); 31 *U. S.* (6 Pet.) 323, 8 *L. Ed.* 414 (1832); *In the Matter of Devoe Mfg. Co.*, 108 *U. S.* 401, 406-10, 2 *S. Ct.* 894, 27 *L. Ed.* 764 (1883); *State v. Babcock*, 30 *N. J. L.* 29 (Sup. Ct. 1862); *Central RR. of N. J. v. Jersey City*, 70 *N. J. L.* 81 (1903), a concise presentation of its history may be found in *Bard, supra*, footnote 2, at 5-24.

of money, and the cordial co-operation of the states of New York and New Jersey in the encouragement of the investment of capital, and in the formulation and execution of the necessary physical plans. . . . [*N. J. S. A.* 32:1-1]

While the Compact delineated the framework for the Port Authority and its operations, the necessity for a more specific implementation was recognized in Article X, which directed the state legislatures to adopt "a plan or plans for the comprehensive development of the port of New York" "as soon as may be practicable." *N. J. S. A.* 32:1-11. The formulation of this plan was undertaken by the Authority's initial board of commissioners, whose *Report with Plan for the Comprehensive Development of the Port of New York, December 21, 1921* (1921) was eventually enacted as the Comprehensive Plan mandated by the Compact.[4]

This plan envisioned an active and affirmative role for the Port Authority in the development of the Port District.[5] Section 8 of the Comprehensive Plan provided:

The Port of New York Authority is hereby ***authorized and directed to proceed with the development of the port of New York*** in accordance with said comprehensive plan as rapidly as may be economically practicable and is hereby vested with all necessary and appropriate powers not inconsistent with the constitution of the United States or of either state, to effectuate the same, except the power to levy taxes or assessments. [*N. J. S. A.* 32:1-33; emphasis supplied]

That fulfillment of this statutory mandate contemplated the involvement of the Port Authority in transportation matters of the Port District is undeniable. This responsibility, for

---

[4]The Comprehensive Plan was enacted in *L.* 1922, c. 9, now contained in *N. J. S. A.* 32:1-25 *et seq.* New York approved the Comprehensive Plan in *Laws of New York* 1922, c. 43, now found in *N. Y. Unconsol. Laws* § 6451-68 (McKinney (1961)). Congressional consent was secured in *S. J. Res.* of July 1, 1922, c. 277, 42 Stat. 822.

[5]The metes and bounds of the Port District are defined in *N. J. S. A.* 32:1-3.

example, was explicitly mentioned in that portion of the preamble of the Compact cited above. Article XXII of the Compact further clarifies this responsibility by defining "transportation facility" as including:

> . . . *railroads*, steam or electric, motor truck or other street or highway vehicles, tunnels, bridges, boats, ferries, carfloats, lighters, tugs, floating elevators, barges, scows or harbor craft of any kind, aircraft suitable for harbor service, and every kind of transportation facility now in use or hereafter designed for use for the *transportation or carriage of persons or property*. [*N. J. S. A.* 32:1–23; emphasis supplied]

The centrality of the railroads to the organizational and coordination schemes of the Port Authority was highlighted by the separate definition of "railroads."[6] This was a reflection of the final report by the New York, New Jersey Port and Harbor Development Commission, which in 1920 had recommended the establishment of a bi-state agency with appropriate jurisdiction. See footnote 2, *supra*. The report, whose factual findings served as the basis for the Compact and the Comprehensive Plan, found the commercial inadequacies of the metropolitan area to be "primarily a railroad problem." The absence of railroad coordination and accessibility at many places within the district consequently required "essentially a railroad plan." The Commission summarized its suggestions in a proposal which entailed the establishment of railroad beltline systems between New Jersey and New York, and concluded:

> This remodeled terminal railroad system, bringing every railroad of the Port to every part of the Port, and thus giving every part of the Port opportunity to develop and to have the economical trans-

---

6*N. J. S. A.* 32:1–23 provides:

"Railroads" shall include railways, extensions thereof, tunnels, subways, bridges, elevated structures, tracks, poles, wires, conduits, powerhouses, substations, lines for the transmission of power, car barns, shops, yards, sidings, turnouts, switches, stations and approaches thereto, cars and motive equipment.

portation service needed for its commercial and industrial growth and expansion, constitutes the comprehensive plan of the Commission — the plan which the Commission recommends for formal adoption by the two states. [New York, New Jersey Port and Harbor Development Commission, *Joint Report, supra* footnote 2, at 3]

This statutory responsibility to develop the transportation facilities of the Port District, and particularly facilities relating to railroad operations, contained an implicit obligation to foster passenger transportation service. Although the Port and Development Commission report concentrated on the freight shipment needs of the area, it did not preclude a comparable role for the Port Authority in passenger service. With one notable exception, the Port Authority's role in passenger service is confirmed by the early history of the agency. In this regard, however, even that exception, the 1928 veto message of Governor Alfred E. Smith of New York which rejected a New Jersey proposal for the development of a rapid transit system between the states, may be no more than a personal predilection. [7] See 134 *N. J. Super.* at 149. Noting that the Port Authority should "stick to this program . . .[for] the solution of the great freight distribution problem," Governor Smith at no time denied the agency's power to deal with passenger service, and only suggested a reordering of its priorities. More importantly, the position which he advocated was expressly repudiated by the Port Authority that same year. In a June 11, 1928 resolution supporting the continuation of a Suburban Transit Engi-

---

[7]Governor Smith, in what remains the only major statement questioning a Port Authority role in passenger traffic, remarked:

> **I am satisfied that the Port Authority should stick to this program, and I am entirely unwilling to give my approval to any measure which at the expense of the solution of the great freight distribution problem will set the Port Authority off on an entirely new line of problem connected with the solution of the suburban passenger problem.**

Veto Message, *Public Papers of Governor Alfred E. Smith of 1928*, 187–88 (1938).

neering Board,[8] the Port Authority recognized that it had a responsibility to the metropolitan commuter, based on its broader duty to develop transportation in the Port District:

> The Commissioners of the Port Authority have found in their studies that no adequate or effective interstate transportation development can take place without taking full account of ***transportation of passengers*** as well as of freight throughout the Port District.[9] [Emphasis supplied]

B. *Port Authority Involvement in the Area of Mass Transit; Reports, Studies and Legislation Concerning Mass Transit*

The continuance of its role in mass transportation has been reaffirmed by the Port Authority from time to time. The obligation to provide for passenger service within the

---

[8]The Suburban Transit Engineering Board had been created in response to a Port Authority suggestion in its 1927 Annual Report. As that report stated:

> It is our opinion that, in the long run, the greatest progress will be attained by having this Engineering Board undertake the responsibility for the preparation of the engineering section of a comprehensive suburban transit plan for the entire port district. The Port of New York Authority, *Annual Report for 1927*, 56 (Jan. 20, 1928).

Parenthetically, it should be noted that this body was the intended recipient of the funds which Governor Smith vetoed. The Port of New York Authority, *Annual Report for 1928*, 63 (Dec. 31, 1928).

[9]*Annual Report for 1928*, *supra* footnote 8, at 64–66. The Port Authority answered more directly the fears expressed by Governor Smith in a subsequent part of its June 11, 1928 resolution:

> The Commissioners of the Port Authority are satisfied from the reports of their staff that continuance of the work of the Suburban Transit Engineering Board and the participation therein by members of the staff of The Port of New York Authority will not at this time divert any of their efforts away from the effectuation of the statutory Comprehensive Plan nor from their duties in the field of protecting the Port nor from any other pending work of the Port Authority, but on the contrary, the continuance of such Suburban Transit Engineering Board's work will facilitate the other work of the Port Authority. [*Id.* at 65]

Compact's injunction to the Post Authority has not only been acknowledged by those whose occupations and interests are related to the transportation field,[10] but by ranking members of the Port Authority staff as well. For example, the following colloquy between Assemblyman J. Edward Crabiel and the Port Authority's then Executive Director Austin J. Tobin occurred at a 1958 legislative hearing:

> ASSEMBLYMAN CRABIEL: Mr. Tobin, just to clear my mind on certain key points — I have been reading your report and listening to your talk — there is no question that, as far as the compact between the two states is concerned, *the Legislatures could direct the Port Authority to do rapid transit and that that would be within their compact.*
>
> MR. TOBIN: *Yes sir. There's no question about it.* [*Hearings on Assembly Bills No. 16 and 115 and Senate Bill No. 50, supra* footnote 10, Nov. 24, 1958, at 44] (emphasis supplied).

The manifestations of this responsibility have been insignificant such as the separate sections which the Authority devoted to "Suburban Transit" in its earlier Annual Reports (a practice by the way, which has been resumed since the Port Authority's acquisition of the H & M railroad in 1962). See T. W. Kheel & R. J. Kheel, "The Port Authority 1962 Covenant — Bar to Mass Transportation," 27 *Rutgers L. Rev.* 1, 5(1973); The Port of New York Authority, *Annual Report for 1923,* "Commuter Passenger Traffic," 35–36 (Jan. 19, 1924); *Annual Report for 1924,* "Congestion of Passenger-Traffic," 23–24 (Jan. 24, 1925); *Annual Report for 1929,* "Suburban Transit," 27–28 (Dec. 31, 1930). More indicative, however, of the Port Authority's

[10]See *Hearings on Assembly Bills No. 16 and 115 and Senate Bill No. 50 before N. J. Assembly Comm. on Fed. & Interst. Rels. and Assembly Comm. on Highways, Transp. and Pub. Utilities,* Nov. 24, 1958, at 18A (Statement of Augustus S. Dreier, Counsel, Inter-Municipal Group for Better Rail Service); Dec. 3, 1958, at 22-A (Statement of Herman T. Stichman, Trustee, Hudson & Manhattan Railroad) (hereinafter referred to as Assembly Hearings); *Caro, The Power Broker Robert Moses and The Fall of New York,* 922–23 (1974).

role in rapid transit operations have been the infrequent reports which it has issued on this subject.[11] The representativeness of at least 14 of these reports cannot be premised on any successful projects which they have stimulated or realized. As frankly admitted by Edward J. O'Mara, a chairman of the Metropolitan Rapid Transit Commission (a Port Authority-funded investigative agency which itself produced an unsuccessful series of legislative proposals):

> For at least 35 years, there has been a growing public awareness of the importance of mass transportation in the metropolitan region in the State of New Jersey. At least 14 more or less extensive studies have been made of the problem by various committees and commissions. Nothing has ever come of them, and in the meantime the problem has been becoming progressively more acute. [*Assembly Hearings*, Nov. 24, 1958, at 70A]

---

[11]These reports have been conducted on a variety of topics and in conjunction with various other interested organizations. Some, though by no means all, of these studies have included a continuing study begun in 1927 of the suburban transit facilities to relieve traffic congestion in conjunction with a variety of other groups (pursuant to New Jersey legislative authorization, *L.* 1927, *c.* 277); a 1937 study entitled "Suburban Transit for Northern New Jersey (Mar. 1, 1937) concerning interstate and suburban passenger problems within the Port District and New Jersey in particular (undertaken pursuant to *L.* 1936, *c. J. Res.* No. 6); a continuation of studies begun in 1937 and the presentation of legislative proposals for implementing a new transit system (pursuant to *L.* 1938, *c. J. Res.* No. 1); a 1948 study concerning the development of a rapid transit system in Northern New Jersey which would link Newark Airport and New York City (undertaken pursuant to a request by New Jersey Governor Alfred E. Driscoll); 1948 study concerning the development of a north-south transit line in Hudson County (initiated at the request of the City of Bayonne); and the creation in 1952 of the Metropolitan Rapid Transit Commission to undertake a comprehensive study of the transit problems of the Port District (*L.* 1952, *c.* 194). By agreement reached in 1955, the Port Authority provided $800,000 when this last study was inaugurated. The Commission's report was released in 1958. In addition, the Port Authority in the early 1960's conducted a series of studies concerning the feasibility of its acquiring the operations of the H & M railroad, and later, the conditions under which the authority would do so.

der Sen. Res. No. 7 (1960) and Reconstituted under Sen. Res. No. 7 (1961)) to Study the Financial Structure and Operations of The Port of New York Authority, Jan. 27, 1961 (2d day), at 64–66 (Statement of Austin J. Tobin, Executive Director, Port of New York Authority). In this respect, these studies provide a broad overview of the historic approach of the Port Authority to the problems of urban mass transit. This background is particularly important because what the Court is truly asked to consider is the manner in which the Port Authority has dealt with the problems of mass transit in the Port District, and the attitudinal reluctance which has characterized its efforts in this area of transportation.

These studies, in conjunction with the annual reports which are issued by the Port Authority, possess several characteristics worth noting. First, virtually none of the studies resulted from the Port Authority's own initiative. Most of the studies were the product of either legislative or other governmental requests for pertinent information and proposals. See footnote 11, *supra.* While the failure to take affirmative administrative or investigatory action may not necessarily be indicative of an agency's abdication of responsibility in the case of the Port Authority, the failing is particularly suspect. This is because the duties expressly imposed on the Port Authority by the 1921 Compact were those to "make plans for the development of said district, supplementary to or amendatory of any plan theretofore adopted;"[12] and to suggest to the state legislatures recommended means to improve Port commerce.[13]

---

[12]*N. J. S. A.* 32:1–12, which was contained in the original Compact as Article XI and which is indicative of a statutory mandate, provides:

> The port authority ***shall*** from time to time make plans for the development of said district, supplementary to or amendatory of any plan theretofore adopted, and when such plans are duly approved by the legislatures of the two states, they shall be binding upon both states with the same force and effect as if incorporated in this agreement. [Emphasis supplied]

[13]*N. J. S. A.* 32:1–13 provides:

> The port authority may from time to time make recommendations to the legislatures of the two states or to the congress of the

Second, none of these studies contains an expressed commitment (much less a recommendation of such a commitment) by the Port Authority to undertake the construction or implementation of a mass transit system. Instead, most of them recommend the assumption of these obligations by other governmental or quasi-governmental bodies and agencies. See The Port of New York Authority, *Suburban Transit for Northern New Jersey,* 10 (1937); The Port of New York Authority, *Annual Report for 1958,* 38–42. In conjunction with this, it should be noted that the Authority was one of the staunchest supporters of two New Jersey legislative proposals, S–50 and A–115, which were introduced and discussed in 1958. See *Assembly Hearings, supra,* Nov. 24, 1958, at 44, 49 (Statements of Austin J. Tobin, Executive Director, Port of New York Authority). Not surprisingly both of these measures presented plans for the establishment of an independent agency to handle matters relating to mass transportation. Conversely, the Port Authority was strongly opposed to a companion proposal, A–16, which would have authorized the agency itself to develop, improve and coordinate the rapid transit facilities in the Port District. *Assembly Hearings, supra,* Nov. 24, 1958, at 18–19 (Statements of Austin J. Tobin, Executive Director, Port of New York Authority).[14]

United States, based upon study and analysis, for the better conduct of the commerce passing in and through the port of New York, the increase and improvement of transportation and terminal facilities therein, and the more economical and expeditious handling of such commerce.

[14]On this point, a noted transportation expert, Michael N. Danielson, observed:

> A good many people in the New York area, particularly in New Jersey, could see no point in creating another agency, whether bi-state or tri-state, as long as the Port of New York Authority apparently possessed both the jurisdiction and financial capacity to tackle the regional rail problem. Time and again, the Port Authority fended off these forays, emphasizing that there was an "absolute incompatibility between railroad deficits and the PNYS'S contractual limitations with its bondholders . . . and to confine itself to self-supporting projects." [*Danielson, Federal-Metropolitan Politics and the Commuter Crisis,* 23 (1965)].

Finally, as previously noted, there has been a startling absence of tangible progress resulting from, or attributable to these investigatory efforts. This is true even though the Port Authority has recognized the commuter problems which beset the New York metropolitan area. As early as 1925, in its Annual Report, the Authority observed:

> **While hundreds of millions of dollars have been spent in urban rapid transit during the past decade, no commensurate amounts have been expended on suburban rapid transit, and the commuter has reached the limit of his endurance where the trunk lines leading into New York City are incapable of handling both suburban and through traffic. The passenger service of every railroad in the Port District is taxed to its limit by the requirements of this service. There is barely room during the rush hours for the trains carrying freight because of the commuter service, while passengers and freight must both necessarily move during these hours. [The Port of New York Authority, *Annual Report for 1924*, 23 (Jan. 24, 1925)]**

See also The Port of New York Authority, *Annual Report for 1927*, 10, 53 (Jan. 20, 1928). Over the years, this recognition has increased with its realization of the expanding dimensions of commuter congestion and the inability of private transit facilities to cope with the problem. The Port of New York and New Jersey, 1972 *Annual Report*, 10–15 (1972); 1973 *Annual Report*, 10–15 (1973); 1974 *Annual Report*, 4–6 (1974).

The Port Authority's ineffectual investigative efforts cannot be justified due to a theoretical lack of jurisdiction in mass transit operations. Such jurisdiction was given to the agency in the Compact of 1921. Nor is the lack of success due to the financial inability of the Port Authority to assume additional obligations. As the trial court found, the Authority is not only financially sound, but has suffered no detrimental effects from the repeal of the protective 1962 Covenant:

> **Suffice it to say that between 1962 and 1974 the security afforded bondholders had been substantially augmented by a vast increase in Authority revenues and reserves, and the Authority's financial ability to absorb greater deficits, from whatever source and without any**

significant impairment of bondholder security, was correspondingly increased. [134 *N. J. Super.* at 194–95]

Rather, the limited effectiveness of these studies is merely symptomatic of an underlying limitation which the Port Authority has imposed on its own involvement in mass transportation. This limitation, which is derived from a narrow construction of its statutory powers, precludes an undertaking by the Authority unless the relevant project will be financially self-supporting, or will only generate deficits within conservatively defined limits. While the definition of the limitation is presented in purely financial terms, its effect has been to severely restrict the scope of activities in which the agency may engage. Because the majority of mass transportation facilities are closely associated with high deficits, the practical operation of the Port Authority's self-imposed restriction has prevented the Authority from fulfilling its rapid transit obligations.

C. *History of the Self-Supporting Concept*

While the provisions of the Compact and Comprehensive Plan sketched a broad authorization in terms of the activities which were within jurisdiction of the Port Authority, the powers accorded to it were not commensurate with its tasks. Without the necessary power, the Authority could not unilaterally support its statutory mandates, much less initiate action in their behalf:

An impressive body of activities was thus laid out wherein the Port Authority could formulate the needs of the port as a whole and be vigilant to protect its interests. It would serve as a focus and agent of the forces of unity within the port. The primary requirement in this field would not be legal power but adequate funds and continuous application. The Port Authority never lacked support with respect to the former, and was well conceived to function with respect to the latter. But success along this line of endeavor would depend upon cooperation from public agencies and private interests. Where conflicts developed it could make progress very slowly, if at all. [*Bard, supra,* footnote 2, at 58–59]

As a result of setbacks incurred in early legal skirmishes with the powerful railroads in the 1920's, the Port Authority appeared to assume a less assertive role in the port's development than that anticipated by its proponents. Reluctant to promote otherwise desirable activities within the Port District, the Authority restricted its goals to the dubious task of maintaining a balanced budget. The difficulty of this objective was compounded by the fact that under both the Compact and the Comprehensive Plan, the Port Authority had been denied the power to either levy assessments or pledge the credit of either state. *Annual Report for 1954,* vi (1954). Consequently, to offset the costs and losses which it incurred, the agency was dependent upon the revenues which it realized from its various projects and facilities.

While this new objective in the early years of the Port Authority was tempered by a "rule of economic practicability," The Port of New York Authority, *Annual Report for 1926,* 5 (Jan. 20, 1927), its importance was later elevated by the increased emphasis placed on self-sufficiency. In other words, because the fiscal stability of the Port Authority was dependent upon the revenues of its facilities, it was necessary for all projects to demonstrate their self-supporting capacity before the Authority would undertake their implementation. Thus, James C. Kellogg, III, the then Vice-Chairman of the Port Authority, read from a prepared statement before a Senate Commission in 1960, as follows:

> In order that the Port Authority might carry out the tremendous and continuing task of developing the public terminal and transportation facilities of this metropolitan area, the two Legislatures clothed it with all necessary and appropriate powers of port and terminal development, with the important exception of the power to tax or to levy assessments. This reservation is the key to the whole concept of the Port Authority, which is that of a self-supporting agency, whose public projects are carried on through the development of their own revenues and charges, and which imposes no burdens on the general taxpayer. [*Hearings before N. J. Sen. Comm'n Created under Sen. Res. No. 7 (1960) to Study the Financial Structure and Operations of the Port of New York Authority*, September 27, 1960, 7–8 (Statement of James C. Kellogg, III, Vice-Chairman of the Port Authority)].

The objective of a self-supporting authority, while salutary in principle, was inconsistent with the Port Authority's original objectives and early history. In its annual report for 1924, the Authority explicitly rejected the self-supporting concept as a basis for its operations:

> **Preferably, and in the main, therefore, the Port Authority regards itself rather as the guardian and guide of the Port District, protecting it against attacks both from within and without, and directing its activities and developments with a view to procuring the greatest cooperation of existing agencies, the utmost efficiency and the minimum of cost. *If such is to be its primary function it should not be expected to be self-supporting.* [The Port of New York Authority, *Annual Report for 1924*, 9–10 (Jan. 24, 1925); emphasis supplied]**

Moreover, the self-supporting concept as a fundamental precept of the Port Authority's financial scheme is belied both by the projects which it embarked upon after its creation and by subsequent developments in its financial structure. As the trial court observed, because of the heavy investment required by these early projects, the Port Authority was confronted with large deficits from the outset. 134 *N. J. Super.* at 140. However, rather than restricting the Authority's activities, New Jersey and New York encouraged such projects by advancing funds, transferring control of lucrative facilities (such as the Holland Tunnel) to the Authority, and permitting the Authority to issue "open-ended" bonds. This latter device, in particular, helped free the Port Authority from absolute reliance on self-supporting projects. By placing all revenues derived from the sale of open-ended bonds into a common fund, the Port Authority was able to free deficit operations from the inadequate sales of their particular bonds. *Goldberg, A History of the Port of New York Authority Financial Structures,* 5 (1964). The pooling of resources not only permitted the Port Authority to finance debt-ridden facilities through those which were profitable, but simultaneously afforded bondholders a certain degree of security regardless of the success or failure of any given project. The open-ended financing of the Port

Authority, which was originally introduced in the form of the General Reserve Fund (*N. J. S. A.* 32:1–142), literally, the pool into which all funds were paid, was later expanded by the Authority's adoption of the Consolidated Bond Resolution in 1952. This resolution, which abandoned the practice of earmarking funds for specific projects, authorized the issuance of bonds whose revenues would be designated by the Authority for a given project according to its needs. As the trial court found, the resolution obviated any further concern for maintaining the self-supporting concept as a prerequisite to Port Authority involvement in a project:

With the adoption of the CBR the "self-supporting" facility concept which had governed earlier authority financing ceased to have the significance previously attached to it; for under the CBR the Authority's financial structure is based on a unitary enterprise concept and all revenues from all facilities are pooled. Individual facilities are not financed independently of the rest of the Authority. The facilities contribute their revenues for debt service on all Authority bonds according to their earning power and without regard to the amount of bonds issued for the construction of any particular facility. [134 *N. J. Super.* at 143]

Enactments such as the General Reserve Fund and the Consolidated Bond Resolution created the possibility for the involvement of the Port Authority in traditionally deficit operations such as mass transportation. Nonetheless, the translation of this new financial freedom into practical action was not forthcoming from the Port Authority:

That cashbox, so long empty, was full now, thanks to the postwar traffic boom, . . . the Port Authority's was worth $700,000,000. Long on cash, moreover, the Port Authority was short on dreams. The visionaries who had created it were long gone from its councils; Julius Henry Cohen had been replaced by money men like Cullman and Colt and Pope whose eyes were brightened by the balances in the Authority's ledgers, not by the potentialities for improving the common weal that those balances represented. The purpose for which the Authority had been created — the development of an *overall* transportation system to knit together a great port — had been lost sight of for years. Plans the Authority had aplenty, of course, but unrelated plans, plans for individual projects, joined by no link other than the fact that their construction would return the agency profit. [*Caro, supra,* footnote 10, at 922–23]

The resultant program which the Port Authority pursued represented less of an integrated effort to organize and co-ordinate the commerce of the port of New York, and more of an administrative mish-mash with little cohesiveness or relation to the agency's statutory mandate. Thus, construction of a World Trade Center, with little or no relation to the activities for which the Port Authority was created, was suddenly elevated to an importance which transcended that of a more traditionally-regarded responsibility of the Authority such as mass transportation.

The underlying rationale for these actions was unmistakably attributable to retention of the self-supporting limitation to which the Port Authority had previously adhered. This was made clear by Executive Director Tobin of the Port Authority when questioned at a 1958 hearing about the manner in which future revenues and reserves would be committed:

> Well, it is closed unless those future bond issues have to do with projects that can be made self-supporting and in which the Commissioners of the Port Authority will not only certify as *a matter of conscience* and a matter of record that they believe that they can be made self-supporting and will add to the general credit of the Port Authority; but also if they can demonstrate arithmetically on sound projections of its existing net revenues and its maximum future debt service that those projects will not hurt this bondholder. That's all he has. If that bondholder has an open end bond without those restrictions, he has a piece of paper. [*Assembly Hearings*, *supra*, November 24, 1958, at 38 (Statement of Austin J. Tobin, Executive Director, Port of New York Authority); emphasis supplied]

This self-limitation has exacerbated the Port Authority's demonstrated lack of initiative. For example, although the Port Authority in 1955 agreed to provide the Metropolitan Rapid Transit Commission with $800,000 for that body's study of a metropolitan scheme of mass transit, the price which the Authority extracted for its financial support was a "Memorandum of Understanding" which precluded its own role in any deficit operations which the Commission

might recommend. *Danielson, supra* at 23; *Assembly Hearings, supra,* December 3, 1958, at 91–A to 92–A (Statement of Frank H. Simon, Executive Director, Metropolitan Rapid Transit Commission). More importantly, perhaps, the Port Authority's inertia has interjected itself in the relationship between the agency and the Legislatures which it allegedly serves. This has been done in an often contradictory fashion as illustrated by the following discussion between Assemblyman Crabiel and Executive Director Tobin:

ASSEMBLYMAN CRABIEL: What I'm getting at here is, you're saying categorically that you cannot take a deficit. Now, I'm raising the point that as far as the Legislatures of the two states, when they established the compact there was nothing in the compact and nothing in the instructions from the Legislatures to the Port Authority that they could not undertake a deficit operation.

MR. TOBIN: Well, excuse me, sir. I'd say that there was. I would say that the way the statutes are phrased, it could undertake nothing except a self-supporting operation. We have no way of financing anything but a self-supporting operation.

ASSEMBLYMAN CRABIEL: Well how do you account for the fact, then, that you have operated deficit operations?

MR. TOBIN: Because the pooled revenues have been sufficient. Because we believed also, when we went into those, that they could be self-supporting and we were wrong.

ASSEMBLYMAN CRABIEL: That's what I was pointing up. [*Assembly Hearings, supra,* November 24, 1958, at 45]

III

THE ROLE OF THE PORT AUTHORITY

Ultimately, those who are most hurt by the Port Authority's failure to enter the field of mass transportation are of course, the commuters. Absence of Port Authority initiative in this area is a direct reflection of the deficits which are inherent in the provision of this public service:

Until the late 1950's, transit operations in the United States were generally profitable and, consequently, attractive to investment. Decline in patronage and increasing labor and equipment costs have completely reversed this trend to a point where today, public transit in its everyday operations in most cities is a losing proposition. The losses are not as great as sometimes presumed but, in most

cases, average between 20 and 25 percent annually. Therefore, public transit — like many other sectors of the transportation industry, including private automobile transportation — now requires substantial public support in the form of direct financial subsidies to be capable of rendering necessary services. [Roeseler and Levi, "State Subsidies for Public Transit: An Overview of Current Legislation," 4 *Urban Lawyer* 59, 60 (1972)]

See also Kneafsey and Edelman, "A Market-Oriented Solution to the Northeast Railroad Dilemma," 41 *I. C. C. Pract. J.* 174 (1973–74). This problem concerning the financial weaknesses of mass transit facilities has been realized within the New York metropolitan area. This, no doubt, has resulted from both the unusually heavy demands which have been placed on these systems in the Port District, and the lack of a perceived common interest among the District's geographic and political components. *Danielson, supra*, at 21–22.

The Port Authority's failure to assume an active role in solving this problem has had a concurrent effect on the traveling habits of the average commuter. Faced with increasing service cutbacks and escalating fares, the commuter is left with fewer alternatives to the private automobile. Grubb, "Urban Transportation Alternatives to the Automobile," 39 *I. C. C. Pract. J.* 19 (1971–72); Cooper, "Prospects for a Mass Movement to Public Transit," 5 *Urban Lawyer* 679 (1973). His increasing resort to this mode of transportation in turn has caused a drastic increase in traffic congestion and air pollution which are commonly associated with the metropolitan area.

These problems have stimulated legislative responses on both the federal and state levels. The federal response consists primarily of the Urban Mass Transportation Act of 1964, 49 *U. S. C. A.*, § 1601 *et seq.*, which purports to encourage "the planning and establishment of areawide urban mass transportation systems needed for economical and desirable urban development, with the cooperation of mass transportation companies both public and private." 49 *U. S. C. A.*, § 1601. See Haley and Watkins, "The Urban Mass Transporta-

tion Assistance Act of 1970 — A Federal Program Comes of Age," 16 *N. Y. Law For.* 741 (1970). As a corollary to the urban mass transit crisis, the federal government has enacted the Clean Air Act, 42 *U. S. C. A.*, § 1857 *et seq.* Similar considerations produced comparable legislation in New Jersey, Emergency Energy Fair Practices Act of 1974. *L.* 1974, *cc.* 2, 6; Executive Order No. 1 (Feb. 5, 1974).

These legislative enactments were most recently recognized in a report issued by the Joint Transportation and Communications Committee of the New Jersey Legislature. *Report of the Senate and General Assembly Joint Transportation and Communications Committee (Pursuant to Assembly Concurrent Res. No. 211 of 1974)*, October 6, 1975. As the report noted:

> The legislation passed by New Jersey during the last four years clearly reflects the determination on the part of its officials to direct the Port Authority towards making a greater financial commitment to mass transit. In order to determine whether New Jersey has been treated by the Port Authority in a fair and impartial manner the Committee has investigated the degree of Port Authority responsiveness to meeting the mass transportation needs of the State. [*Id.* at 13]

The Committee's conclusion was succinct as it was unfortunate:

> The Committee recognizes that the Port Authority has acquired a reputation for its engineering, planning and management skills. It is the conclusion of the Committee, however, that in the area of mass transportation the Port Authority's performance has not been satisfactory. [*Id.* at 17]

The Committee's conclusions were premised upon the same type of factors which I have considered above. While the Committee was hopeful that the Port Authority would take its mass transportation responsibilities "more seriously" in the future, it nonetheless pledged "its vigilance to see that the

Port Authority completes the mass transportation projects it has promised to complete." *Id.* at 18, 19.[15]

The sensitivity of the state government to the urgent need for more modern means of public transportation has not been confined to the legislative branch. In his recent "State of the State" address, Governor Byrne not only recognized this problem, but concurrently cited the Port Authority's responsibility for its solution. Perhaps even more important, the Governor indicated his willingness to impose an affirmative sanction on the Port Authority should the desired action in the area of mass transit not be forthcoming:

> How do we keep the railroads running at a time when the state subsidy program costs over $100 million a year and has been growing by more than 35 per cent a year? Should there be an overall operating agency for these lines? What about the communities and industries served by lines soon to be abandoned? Where can we find the $255 million required to match federal funding for the

---

[15] While the history of the Port Authority's involvement in mass transportation has been discouraging, the prospects for renewed efforts by the agency in this area of endeavor are hopeful. In the above cited report by the Legislature's Joint Transportation and Communications Committee, the development of a mass transportation plan by the Port Authority was noted. *Report of the Senate and General Assembly Joint Transportation and Communications Committee (Pursuant to Assembly Concurrent Res. No. 211 of 1974,* 16–17 (October 4, 1975)). This plan committed the Port Authority to the provision of additional direct rail service to Penn Station in New York City for New Jersey commuters, the expansion of the Midtown Bus Terminal, the construction of a rail link to Kennedy Airport and the extension of the PATH system from Newark to Plainfield. Although the Urban Mass Transportation Administration on December 19, 1975 rejected New Jersey's request for $278-million to construct the PATH extension, the State's expressed intention to reapply for such funds will create the possibility of a continued role for the Port Authority in mass transportation. *The Sunday Star-Ledger*, December 21, 1975, at 1, 8; *The New York Times*, December 22, 1975, at —; *The New York Times*, January 4, 1976, at 34. This persistence has apparently been successful as federal approval of a $400-million block grant for the PATH extension to Plainfield and other mass transit projects is anticipated. *The Star-Ledger*, February 10, 1976, at 1.

modernization of two major commuter lines and the extension of PATH to Plainfield?

The Port Authority of New York and New Jersey must increase its commitment to these efforts. If it is unwilling to do so, we will insist that it rescind the toll increases instituted last year for the specific purpose of funding improvements in the public transportation system. [Annual Message of Governor Brendan T. Byrne, Jan. 13, 1976, at 19]

I, too, would similarly take this opportunity to demonstrate the vigilance which has motivated the Joint Committee and the Governor. The Port Authority has too long neglected the responsibility with which it was statutorily charged in 1921. In *So. Burlington Cty. NAACP v. Tp. of Mt. Laurel,* 67 *N. J.* 151, 189 (1975), we recognized the significance of transportation to the overall development of an urban area. I would today reaffirm this significance.

IV

CONCLUSION

The relief which I recommend today is intended as an answer to a problem which has assumed crisis proportions. The Port Authority is the producer, the director and the main character of the play known as "The Disease of Mass Transportation." This malady has suffered too long from the benign neglect of public agencies such as the Port Authority, and such neglect has permitted the disease to spread unattended. The resulting state of affairs may most accurately be described as one of emergency. While the appellation "emergency" was at one time reserved for calamitous and natural occurrences, the inadequate and deteriorating quality of mass transit in the metropolitan area has had an eroding effect on the urban environment in which it operates. This effect has been measurable not only in terms of the unending lines of commuters who have been inconvenienced by inefficient service, but also in terms of traffic congestion with its attendant pollution as well. The courts of this country have long recognized that such emergent circumstances may

serve as a mandate to administrative action. "While emergency does not create power, emergency may furnish the occasion for the exercise of power." *Home Building & Loan Ass'n v. Blaisdell,* 290 *U. S.* 398, 425–26, 54 S. Ct. 231, 235, 78 *L. Ed.* 413, 422 (1934); *Hourigan v. North Bergen Tp.,* 113 *N. J. L.* 143, 148 (E. & A. 1934).

For an Authority that is long on cash and short on dreams,[16] it is time to respond for those who have long suffered the inconvenience and expense which have resulted from the Port Authority's inaction.

I would order the Port Authority, its Commissioners and its Executive Director to not only complete those projects to which it is already committed, but to formulate and present plans and suggestions for a regional mass transportation scheme to the Legislatures of New York and New Jersey. Implicit in this would be the requirement that such efforts be completed in an expeditious fashion and within a fixed period of time. This injunction is necessary to bring home the importance of Authority action in the face of the current transportation crisis.

In proposing this relief, I should not be understood as advocating usurpation of the functions of either the executive or legislative branches of government. The majority's characterization of my position is in error. (At 259). My disposition does not contemplate ordering either the Governors or the Legislatures of the States of New Jersey and New York to undertake any particular course or courses of action. I would be loathe to intrude upon the relationships which have developed between these other branches of state government and the Port Authority. Nonetheless, I am all too aware of the fact that expertise in the field of mass transit operations resides in the body which was originally vested with both power and jurisdiction in that area, namely the Port Authority. By according the Authority a statutory mandate to

---

16 *Caro, supra, footnote* 10 at 922.

undertake mass transportation projects, it was anticipated by both States that the Port Authority would actively research, promote and recommend projects to be authorized and implemented by the State Legislatures. It is precisely the Port Authority's reluctance to utilize its expertise that has frustrated this basic first step towards the development of a much-needed integrated mass transportation system in the metropolitan area. Therefore, I would order the Port Authority to proceed with this initial planning stage, while, at the same time, acknowledging that ultimate adoption and implementation of the resultant plans remain a legislative and executive prerogative. The declared willingness of those branches of government to adopt appropriate measures leaves me confident that only timely suggestions by the Port Authority are needed to point the direction towards improved mass transit operations.

Although I am unsure whether it is the perception of my suggested order as a usurpation of executive and legislative function which underlies the majority's disagreement with such relief, I am, nonetheless, clear in my opposition to the lesson in civil procedure which the majority would impose on this case. I find that the majority's exercise of power under a writ of *mandamus* would ill-befit a remedy with such a Marshallian association. *Marbury v. Madison,* 5 *U. S.* (1 Cranch) 137, 2 *L. Ed.* 60 (1803). This is a direct result of not only the restrictive but the erroneous construction which the majority gives to the powers implicit in a *mandamus.* The writ of *mandamus* is a remedial process whose essential function is to compel the performance of a ministerial action *or the exercise of a discretionary function. Roberts v. Holsworth,* 10 *N. J. L.* 57 (Sup. Ct. 1828); *Switz v. Middletown Twp.,* 23 *N. J.* 580 (1957). This mode of relief is particularly appropriate with regard to recalcitrance by public officials or authorities. *Bd. of Taxation v. Belleville,* 92 *N. J. Super.* 338, 340–41 (Law Div. 1966). While the court has the power under a *mandamus* to compel action, it does not similarly have the power to control discretion in the performance of

the designated action. Such discretion properly resides in the functioning authority.

By its construction of the *mandamus*, the majority would not only accord the authority discretion in the manner of performing the compelled action, but would permit the authority discretion as to whether the ordered action should be performed at all. Although the majority has recognized that the Port Authority has resisted efforts to promote its involvement in mass transportation, it would consider this to be an exercise of discretion which would preclude a *mandamus* or an order similar to the one which I have suggested:

> **As we have sought to demonstrate, the circumstances before us do not at all invite or accommodate the remedy proposed. This is so because the Authority (whose function is clearly not ministerial) has in fact exercised its discretion, even though that exercise has resulted in the rejection of a policy favoring mass transportation. Being a judgment decision its wisdom may be open to dispute; but as to the propriety of this Court's refusal to intrude on the underlying policy determination, there can be no question in the circumstances before us [At 259].**

I cannot subscribe to such reasoning, whose circular nature would undercut the relief which the majority otherwise feels warranted under the circumstances and which would effectively emasculate the *mandamus*, or any similar relief, as a remedy.

I reject the majority's approach to the problem of this case within a procedural context. We have been taught that there are no rights without remedies. By stripping us of our remedies, the majority is most assuredly divesting us of our rights. *Marbury v. Madison, supra*, 5 *U. S.* (1 Cranch) at 163, 2 *L. Ed.* at 69. Furthermore, we have long passed the days wherein cases were decided on the niceties of procedural technicalities. *Hodgson v. Applegate*, 31 *N. J.* 29, 43 (1959); *Edelstein v. Asbury Park*, 51 *N. J. Super.* 368, 385 (App. Div. 1958). There is no need to resurrect in this case another of these manifestations of by-gone days.

Even if I were to acknowledge the necessity of specifically resorting to a *mandamus* or its equivalent, I could not justify withholding such relief in this case; nor can I presently understand the distinction which the majority draws between the *mandamus* which they recommend and the order which I propose. Granting that mandamus is an "extraordinary remedial process," *Beronio v. Pension Comm'n of Hoboken,* 130 *N. J. L.* 620, 623 (E. & A. 1943), aff'g 129 *N. J. L.* 557 (Sup. Ct. 1943), I cannot see the unfortunate plight of the more than 30 million commuters who are dependent upon the Port Authority's transportation services annually, nor the Authority's benign neglect of their plight, as being anything less than extraordinary. This is particularly so where to adopt the majority's approach would permit the Port Authority to ignore the statutory responsibilities with which it was charged in 1921.

The majority in *Gaby v. Port of New York Authority* has been unwilling to take the action which I regard as imperative. From its disposition I must, therefore, respectfully dissent.

For affirmance—Justices MOUNTAIN, SULLIVAN and CLIFFORD and Judges CONFORD, CARTON and HALPERN—6.

Concurring in part and dissenting in part—Justice PASHMAN—1.

Decision of the Superior Court of New Jersey, Law Division, Bergen County

UNITED STATES TRUST COMPANY OF NEW YORK, ETC., PLAINTIFF, v. THE STATE OF NEW JERSEY, *ET AL.*, DEFENDANTS .

DANIEL M. GABY, PLAINTIFF, v. THE PORT OF NEW YORK AUTHORITY, *ET AL.*, DEFENDANTS.

Superior Court of New Jersey
Law Division

Argued April 8, 9, 1975—Decided May 14, 1975.

SYNOPSIS

Consolidated actions were brought concerning constitutional validity of legislation creating, and later repealing, a covenant between the States of New Jersey and New York and holders of bonds issued by the Port Authority of New York and New Jersey. Defendants filed counterclaim for declaration of validity of repealing legislation. The Superior Court, Law Division, Gelman, J. S. C., held that legislative enactments, such as the 1962 covenant whereby the States and Authority were precluded from applying Authority revenues and reserves for passenger railroad purposes unless permitted by criteria set forth in the covenant, can constitute a contract within meaning of the contract clauses of the State and Federal Constitutions, that not every impairment of a contract obligation or security for its performance runs afoul of the contract clause, that a State's inherent power to protect the public welfare may be validly exercised under the contract clause even if it impairs a contractual obligation so long as it does not destroy it, and that in view of emergent problems of air pollution, crises in mass transit and energy problems repeal legislation was a reasonable and valid exercise of the State's police power and was not prohibited by the contract clause of either the Federal or State Constitution.

Complaints dismissed; judgment for defendants on counterclaim.

Mr. Robert B. Meyner and Mr. Devereux Milburn (of the New York Bar) for plaintiff United States Trust Company (*Messrs. Meyner, Landis & Verdon,* attorneys; and *Messrs. Carter, Ledyard & Milburn,* attorneys; and *Mr. Donald J. Robinson* (of the New York Bar) *Messrs. Hawkins, Delafield & Wood,* attorneys).

Mr. Michael I. Sovern (of the New York Bar) and *Mr. Murray J. Laulicht,* special counsel for defendants (*Mr. William F. Hyland,* Attorney General of New Jersey, attorney; *Mr. Harold S. H. Edgar* (of the New York Bar) on the brief).

Mr. Theodore W. Kheel (of the New York Bar) and *Mr. Howard Stern* for plaintiff Daniel M. Gaby (*Messrs. Battle, Fowler, Stokes & Kheel,* attorneys, and *Messrs. Shavick, Stern, Schotz, Steiger & Croland,* attorneys).

Mr. Joseph Lesser (of the New York Bar) for defendant Port Authority of New York and New Jersey (*Mr. Francis A. Mulhern,* attorney); and *Mr. Patrick J. Falvey* (of the New York Bar), *Ms. Isobel E. Muirhead, Mr. Arthur P. Berg* (of the New York Bar), (*Mr. Vigdor D. Bernstein,* of counsel).

GELMAN, J. S. C. These are consolidated actions which have as their common subject matter the constitutional validity of legislation of this State creating, and later repealing, a covenant between the States of New Jersey and New York and the holders of bonds issued by the Port Authority of New York and New Jersey (Port Authority).[1] The

[1]Under the terms of the Compact of 1921 creating the Port Authority, *N. J. S. A.* 32:1-1 *et seq.*, legislative action taken by one state

first legislative act in question, *chapter* 8 of the *Laws of* 1962, *N. J. S. A.* 32:1–35.50 (the 1962 covenant), authorized the Port Authority to construct the World Trade Center and to acquire and operate the Hudson & Manhattan Railroad Company. As part of the 1962 legislation the two States enacted a statutory covenant with each other and with the holders of certain Port Authority bonds whereby the States and the Port Authority were precluded from applying the Authority's revenues and reserves for passenger railroad purposes unless permitted by the criteria set forth in the statute. *N. J. S. A.* 32:1–35.55.

The 1962 covenant was repealed by chapter 25 of the *Laws of* 1974.[2] The complaint filed by the United States Trust Company challenges the constitutionality of the repeal act of 1974, and the Gaby complaint attacks the validity of the 1962 covenant. We turn, then, to the procedural history of these actions and the issues projected by the respective pleadings.

Procedural History

1. *The Gaby Action*

On May 16, 1972 plaintiff Daniel Gaby filed a class action complaint for a declaratory judgment that the 1962 covenant violated the Federal and State Constitutions. The complaint named as defendants the Port Authority, its commissioners and executive director, and the then Governor of New Jersey, William T. Cahill. On October 25, 1972, on

---

affecting the powers and duties of the Port Authority is not effective until concurred in by the legislature of the other. *N. J. S. A.* 32:1–8. Statutory citations in this opinion will be limited to the applicable New Jersey statutes unless the context otherwise requires.

[2] In 1972 the Legislature had repealed the 1962 covenant as to all bonds of the Authority issued after the effective date of the act. *L.* 1972, *c.* 208; *N. J. S. A.* 32:1–35.55a. The act became effective upon the adoption of concurrent legislation by the State of New York on May 10, 1973. *Laws of N. Y.* 1973, *c.* 318. The validity of this legislation is not in issue in these proceedings.

the motion of the Attorney General of New Jersey, the complaint was dismissed as to former Governor Cahill. The Attorney General also moved to dismiss the complaint for failure to name as an indispensable party the Port Authority's bondholders. No disposition appears to have been made of the motion at that time.

The Gaby complaint alleges, among other things, that the residents of the State of New Jersey are dependent upon mass transit facilities and are adversely affected by the deterioration of such facilities within the District serviced by the Port Authority (the Port District). It is alleged that the Port Authority was created by the Compact of 1921 and consented to by the United States Congress[3] to assure "cooperation of the two states in the future development" of transportation facilities within the Port District, and that by virtue of the 1962 covenant, restricting the Port Authority's power to acquire or operate passenger rail transit facilities, the two states entered into a new "Compact" without the consent of Congress and in violation of *U. S. Const.*, Art. 1, § 10. The complaint further alleges that the 1962 covenant constitutes an unconstitutional surrender by the State of its sovereign powers "to protect the health, general welfare and safety of the people," and that it has impaired and obstructed existing facilities for the transportation of goods in interstate commerce, in violation of *U. S. Const.*, Art. 1, § 8.

Gaby asks for multifarious relief. Aside from seeking a declaration as to the unconstitutionality of the 1962 covenant, he asks the court to declare the covenant to be subject to repeal, and to direct the Port Authority to formulate and submit to the court a plan for the development of mass transit facilities within the Port District.

The Gaby action was pretried on February 22, 1973, at which time it was stipulated that the action could proceed

---

[3] *Pub. Res. No.* 17, 67th Cong., 1st Sess. (42 *Stat.* 174).

as a class action without formal notice to the class represented by plaintiff. Thereafter both sides moved for summary judgment, and oral argument on the motions was heard on September 26, 1973. At the conclusion of the argument the court directed the parties to submit further briefs on the constitutional issues and on the question whether the bondholders were necessary parties to the Gaby action. Following conferences between counsel and the court, it was agreed the United States Trust Company should be permitted to intervene in the Gaby action as a party defendant to represent the interests of the bondholders in that action. An order to such effect was entered on December 18, 1973, and arguments were rescheduled on the motions for summary judgment.

Prior to the date fixed for the argument the prospects for the adoption of the repeal act became apparent, and further action in the Gaby case was stayed pending future legislative developments.

2. *The United States Trust Company Action*

The New Jersey Legislature completed action on the repeal act on April 22, 1974, and Governor Brendan T. Byrne signed the bill into law on April 30, 1974. On the same day United States Trust Company (U. S. Trust) filed its complaint on behalf of itself as the holder of Port Authority bonds, as trustee for certain designated issues of Port Authority bonds, and on behalf of all holders of consolidated bonds issued by the Port Authority. The complaint names as defendants the State of New Jersey, Governor Byrne and the Attorney General of New Jersey, and seeks a declaratory judgment that the repeal act violated the Federal and State Constitutions.

U. S. Trust alleges that it is the holder (for its own account and in a fiduciary capacity) of $96,000,000 of consolidated bonds issued by the Port Authority; that the Port Authority was intended, under the terms of the Compact approved by Congress, to be a self-supporting public

agency whose obligations were to be and are payable from its net revenues and certain reserve funds; that the 1962 covenant was enacted to protect the Port Authority's existing and future bondholders from the diversion of pledged revenues and reserves to finance deficit mass transit facilities and further to preserve the Port Authority's credit standing; that the Port Authority notified prospective purchasers of its bonds of the existence of the 1962 covenant and purchasers relied on the covenant in purchasing bonds issued by the Port Authority, and that the secondary market for the Port Authority consolidated bonds has been adversely affected by the repeal act.

The complaint alleges that the repeal act violates the "impairment" and "taking" provisions of the Federal Constitution, *U. S. Const.*, Art. I, § 10 and Amends. V and XIV, and the equivalent provisions of the New Jersey Constitution, *N. J. Const.* (1947), Art. IV, § VII, par. 3; Art. I, pars. 1 and 20.

The answer filed by defendants asserts several defenses among which the following may be briefly noted: (1) the repeal act constitutes a reasonable exercise of the police power by the State; (2) the 1962 covenant itself violated the Federal Constitution because of lack of congressional consent; (3) the repeal act does not constitute an "impairment" of the contract since the obligation of the Port Authority to pay its bondholders remains intact; (4) the bondholders were on notice of the reserved powers of the State to repeal the 1962 covenant, and (5) the repeal act was adopted as a police power measure to meet a transportation crisis affecting the health, safety and welfare of persons residing within the District. Finally, the answer asserts a counterclaim for a declaratory judgment that the repeal act is constitutional.

A consent order was entered pursuant to *R.* 4:32-1 in the U. S. Trust action directing that the action be maintained and defended as a class action by U. S. Trust on

behalf of all holders of consolidated bonds of the Port Authority, and that notice to the class be deemed to have been given by means of the media publicity which was disseminated when the action was instituted. On December 10, 1974 the Gaby and U. S. Trust actions were consolidated by order of the court.

The parties to the U. S. Trust action have filed a 366-page stipulation of facts, accompanied by exhibits covering all phases of the case with the exception of two issues: (1) whether the purchasers of consolidated bonds issued by the Port Authority after the adoption of the 1962 covenant relied in fact upon the existence of the covenant, and (2) whether the repeal of the 1962 covenant adversely affected the secondary market for Port Authority bonds. These issues were the subject of a trial on February 4, 5, 6, 7 and 11, 1975, and the court's findings on the issues will be set forth *infra.*

The Formation, Facilities and Financial Structure of the Port Authority.

1. *Formation and Facilities.*

In 1917 the States of New Jersey and New York established the New York, New Jersey Port and Harbor Development Commission (the Commission) to study the facilities and problems of the Port of New York and to recommend a plan for the future development of the Port.[4] The Commission filed its *Report*[5] on December 16, 1920

---

[4]The enabling legislation directed the commissioners to negotiate and agree upon a joint report recommending a policy for the states "to the end that said port shall be efficiently and constructively organized and furnished with modern methods of piers, rail and water and freight facilities * * *." The Commission was to work out "a comprehensive and adequate interstate and Federal port policy, to meet commercial needs in times of peace and the protection of the harbor and adjacent localities in times of war." *L.* 1917, *c.* 130.

[5]*Joint Report with Comprehensive Plan and Recommendations*, New York, New Jersey Port and Harbor Development Commission, 1920 (hereafter cited as the *Report*).

setting forth its findings, conclusions and recommendations. The core recommendation of the Commission was the creation by the two states of a common public agency by means of which the states would cooperate in the future development of the facilities of the Port in accordance with the comprehensive plan recommended by the Commission.[6] *Report* at 436. In discussing the legal precedents for the establishment by the States of an agency having a substantial impact on interstate commerce, the *report* stated:

> Permissive or restrictive, as the case may be, the power of Congress over the instrumentalities of interstate traffic is exclusive, when in a specific case it has been exercised. But this latter limitation, coupled with the broad police power of the State and its control of intrastate commerce, has left to New York and New Jersey a broad field within which they may act without express Federal consent. It is hoped, of course, by securing congressional approval of any plan which may be adopted, to avoid future conflict with the Federal authority over interstate unification and control of the Port. But for the present the States may act alone. [*Report* at 446]

Prophetically the Commission noted that

> [o]ur port problem is primarily a railroad problem. * * * Therefore the comprehensive plan to evolve which this Commission was created is essentially a railroad plan. With the proper network of rail facilities, the development of other terminal facilities can follow along rational lines * * *. A complete reorganization of the railroad system is the most fundamental physical need of the Port of New York. [*Report* at 3]

However, the railroad problem upon which the Commission focused was not that of passenger transit but the handling and distribution of freight and cargo into and out of the Port District, and the comprehensive plan recommended by the Commission addressed itself exclusively to the transportation and distribution, not of persons but of freight

---

[6]The recommendation for a Compact between the States was originally contained in the Commission's preliminary report submitted in 1918.

and cargo by rail, and to a lesser extent by ship and motor truck. In its 474 pages plus appendices the only significant discussion of passenger traffic in the *Report* is contained in the section dealing with ferries and vehicular tunnels. After noting that the bulk of interstate passenger traffic was accommodated by the Hudson River ferries and that the impact of the Holland Tunnel (started in 1920) could not be forecast, the *Report* opined:

> **Vehicular tunnels offer little promise as a means of conveying passengers, and the one rapid-transit facility in existence between the two States, while operated to near capacity, is not sufficiently profitable to warrant optimism that others will be built. [*Report* at 330]**

Following the submission of the Commission's *Report,* the Port of New York Authority[7] was created pursuant to an interstate compact, signed April 30, 1921, between the States of New Jersey and New York. *N. J. S. A.* 32:1–1 *et seq.* The consent of Congress "to each and every part and article" of the Port Authority Compact was obtained effective August 23, 1921. *Pub. Res. No.* 17, 67th Cong. 1st Sess. The preamble of the Port Authority Compact states that "a better coordination of the terminal, transportation and other facilities of commerce in, about and through the port of New York, will result in great economies, benefiting the nation, as well as the states of New York and New Jersey," and that "the future development of such terminal, transportation and other facilities of commerce will require the expenditure of large sums of money, and the cordial co-operation of the States of New York and New Jersey in the encouragement of the investment of capital, and in the formulation and execution of the necessary physical plans."

Article I of the Compact contains the agreement and pledge by the two states of their "faithful co-operation in

---

[7]The name of the Port of New York Authority was changed to the Port Authority of New York and New Jersey on July 1, 1972. *N. J. S. A.* 32:1–4.

the future planning and development of the port of New York, holding in high trust for the benefit of the nation the special blessings and natural advantages thereof". Article II defines the Port of New York District, comprising an area of about 1500 square miles in both states within a radius of about 25 miles from the Statue of Liberty. Article III establishes the Port Authority as "a body corporate and politic, having the powers and jurisdiction hereinafter enumerated, and such other and additional powers as shall be conferred upon it by the legislature of either state concurred in by the legislature of the other, or by act or acts of congress." Article VI vests in the Port Authority "full power and authority to purchase, construct, lease and/or operate any terminal or transportation facility within [the Port] district"; to make charges for the use of such facilities, and "to borrow money and secure the same by bonds or by mortgages upon any property" held by the Port Authority. Article VII provides that the Port Authority "shall have such additional powers and duties as may hereafter be delegated to or imposed upon it from time to time by the action of the legislature of either state concurred in by the legislature of the other," and mandates that the Port Authority shall not pledge the credit of either State except with the consent of its legislature. Article XI requires the Port Authority to make plans for the development of the Port District supplementary to or amendatory of any plan theretofore adopted, and Article XII authorizes the Port Authority to "make recommendations to the legislatures of the two states or to the congress of the United States, based upon study and analysis, for the better conduct of the commerce passing in and through the port of New York."

Article XXII of the Compact defines "transportation facility" to include "railroads, steam or electric * * * and every kind of transportation facility now in use or hereafter designed for use for the transportation or carriage of per-

sons or property", and defines "railroad" as "includ[ing] railways, extensions thereof, tunnels, subways, bridges, elevated structures, tracks, poles, wires, conduits, power houses, substations, lines for the transmission of power, car barns, shops, yards, sidings, turnouts, switches, stations and approaches thereto, cars and motive equipment."

In 1922 the states, with the consent of Congress, adopted a Comprehensive Plan for the development of the Port of New York. *N. J. S. A.* 32:1–25 *et seq.; Pub. Res. No.* 66, 67th Cong., 2d Sess. The Comprehensive Plan sets forth the development program initially envisioned by the Commission for implementation by the Port Authority.

In the Plan, like the *Report* upon which it was based, unification of terminal operations and facilities, consolidation of shipments, adaptation and coordination of existing facilities, improvement of commercial rail, truck and water facilities and other freight handling improvements are set forth as principles to govern the development of the Port Authority. The Comprehensive Plan proposed to establish direct rail freight connections between New Jersey and Manhattan to furnish "the most expeditious, economical and practical transportation of freight especially meat, produce, milk and other commodities comprising the daily needs of the people." *N. J. S. A.* 32:1–29. Section 8 of the 1922 Comprehensive Plan statute denies to the Authority the power to levy taxes or assessments, and provides that the bonds or other securities issued by the Port Authority shall at all times be free from taxation by either state. *N. J. S. A.* 32:1–33. Finally, it should be noted that the power was reserved to the states to add to, modify or change any part of the Plan. *N. J. S. A.* 32:1–26.

Pursuant to the Compact, the Comprehensive Plan and subsequent amendments and supplements thereto, the Port Authority operates all of the interstate vehicular tunnels and bridges in the Port District, which include the Holland

Tunnel[8], the Lincoln Tunnel, the George Washington Bridge, the Bayonne Bridge and the Arthur Kill Bridges. In addition, the Port Authority owns and/or operates the following facilities: Newark International Airport, Teterboro Airport, LaGuardia Airport, John F. Kennedy International Airport and two heliports; Port Newark, the Hoboken Port Authority Marine Terminal, the Elizabeth Port Authority Marine Terminal, the Columbia Street Marine Terminal, the Erie Basin Port Authority Marine Terminal and a Mid-Manhattan Consolidated Passenger Ship Terminal; the Port Authority Bus Terminal, the George Washington Bridge Bus Station and the Newark and New York Union Motor Truck Terminals; the Port Authority Trans-Hudson system (operated for the Port Authority through its wholly-owned subsidiary, the Port Authority Trans-Husdon Corporation) and the World Trade Center.

Excluding the 1921 Compact and the 1922 Comprehensive Plan, the Legislatures of New Jersey and New York have adopted 39 separately enacted, concurrent statutes authorizing the construction and financing of the foregoing facilities, the issuance of bonds and notes by the Authority, the regulation of suits against it, and the establishment of a general reserve fund for the payment of the Authority's obligations. None of these 39 statutes received specific Congressional consent.

2. *The Financial Structure of the Port Authority*

Under the terms of the Compact the power to levy taxes or to pledge the credit of either state was expressly withheld from the Authority. From its inception, with the exception of monies advanced as loans by the states, the Authority was

---

[8]The Holland Tunnel had been constructed by state commissions pursuant to a compact between the states which received the consent of Congress. In 1930 the Holland Tunnel was transferred to the Port Authority in order to enable it to honor its obligations to bondholders in the face of deficits incurred in connection with the Arthur Kill, George Washington and Bayonne Bridges. *L.* 1930, *c.* 247.

required to finance its facilities solely with money borrowed from the public and to be repaid out of the revenues derived from its operations. By reason of these financial limitations two concepts initially emerged which have played an important role in the realization of the purposes for which the Authority was created: first, the specific projects undertaken by the Authority should be self-supporting, *i. e.*, the revenues of each should be sufficient to cover its operating expenses and debt service requirements; and second, since the Authority is a public agency over which its creditors have no direct control, the bondholders should be protected by covenants with the Authority and with the states which have ultimate control over its operations.

The first facilities constructed by the Authority were vehicular spans linking Staten Island and New Jersey — the Arthur Kill Bridges — which were opened to traffic in 1928. A third Staten Island-New Jersey crossing, the Bayonne Bridge, was placed in operation in 1931. In that same year the George Washington Bridge was opened to traffic. With respect to each of these facilities the Port Authority was authorized to and did issue bonds in separate series to pay for the cost of acquisition of lands and construction. The revenues and tolls from each facility were statutorily pledged as security for the repayment of the series bonds issued in conjunction with the specific facility involved. *N. J. S. A.* 32:1–39, 62, 86. The States of New Jersey and New York advanced additional moneys to pay for the costs of construction, and the funds so advanced were accorded a subordinated status to the funds raised by the Authority from the sale of its own bonds to the public. *N. J. S. A.* 32:1–60, 63, 81, 87. The statutory authorizations for each project and its funding were declared to be "a contract or agreement between the two states for the benefit of those lending money to the port authority." *N. J. S. A.* 32:1–65, 89.

The first bonds issued to the public by the Authority were "closed-end" bonds based on the estimated costs of each facility, and the Authority was prohibited from issuing more

bonds than the amount initially authorized for the project. See *Goldberg, A History of the Port of New York Authority Financial Structure* (1964), at 3 (hereafter cited as *Goldberg*). The gross revenues from each bridge were applied first to the payment of expenses of operation and maintenance of the bridge, then to the payment of debt service on its bonds, and the surplus, if any, was to be deposited in a separate reserve fund available only to the bondholders of that series. *Goldberg,* at 4.

As noted earlier, the initial facilities were not self-sustaining, and in 1930 the states transferred the control, operation and the revenues of the Holland Tunnel to the Port Authority to help place the Port Authority on a self-sustaining basis. *N. J. S. A.* 32:1–119. Simultaneously, the states enacted legislation, commonly called the General Reserve Fund Act, *N. J. S. A.* 32:1–142, and by the terms of that act the surplus revenues derived by the Authority from all facilities built with the proceeds of sale of its bonds are pooled so as to create a general reserve fund in an amount equal to 10% of the par value of all bonds issued by the Authority. The act pledges the general reserve fund as security for the payment of interest and principal on all bonds theretofore or thereafter issued by the Authority. Surplus moneys of the Authority in excess of the general reserve fund requirements may be used for any purpose authorized by the states.

The general reserve fund thus becomes available to bondholders to pay the debt service requirements of facilities which were not self-supporting. By this device the surplus revenues of the Holland Tunnel were used to pay the debt service requirements of the Arthur Kill and Bayonne Bridges and the George Washington Bridge. The general reserve fund was also envisioned as a security device to induce the public to invest in future facilities such as the then contemplated Lincoln Tunnel project. See *Goldberg,* at 7.

Following the enactment of the General Reserve Fund Act the Port Authority issued additional series of bonds to finance the construction of the Inland Terminal Building and to repay

the states for the amounts expended by them to construct the Holland Tunnel. *Goldberg,* at 5. In 1935 the Authority commenced the issuance of a new series of bonds, known as general and refunding bonds, the proceeds of which were used to refund all of the original bridge bonds issued by the Authority and to finance the initial construction of the Lincoln Tunnel. These bonds were secured by a pledge of the net revenues of all of the Authority's then existing facilities and by the general reserve fund. Under the terms of the resolution authorizing the issuance of general and refunding bonds the Authority also contracted to create a special reserve fund into which would be paid all net revenues in excess of those required to pay the operating expenses of the Authority's facilities, the debt service requirements for the general and refunding bonds, and to maintain the general reserve fund at its prescribed level. *Goldberg,* at 11. The authorizing resolution imposed limitations on the use of the special reserve fund for the benefit of the bondholders.

In 1947 the Authority commenced the issuance of air terminal and marine terminal bonds, the proceeds of which were used for the acquisition and construction of various airport and marine terminal facilities. These bonds were secured by a pledge of the revenues of the specific facilities financed thereby, as well as by a call upon the general reserve fund to the extent that revenues from the facilities were insufficient to pay operating expenses and debt service requirements. As in the case of the general and refunding bonds, the air and marine terminal bond resolutions provided for their own special reserve funds for the benefit of the bondholders of each of these series.

In 1952 the Commissioners of the Port Authority embarked upon a new scheme for future financing which abandoned the practice of earmarking specific facility revenues as security for its bonds. On October 9, 1952 the Authority adopted the Consolidated Bond Resolution (the CBR), authorizing the issuance of consolidated bonds to serve as the medium for financing its activities in furtherance of any purpose for

which the Authority is authorized to issue bonds secured by a pledge of the general reserve fund.[9] Consolidated bonds constitute general obligations of the Authority, and all such bonds are equally and ratably secured by a pledge of the net revenues of all existing facilities and any additional facilities which may be financed in whole or in part by the issuance of consolidated bonds.[10]

With the adoption of the CBR the "self-supporting" facility concept which had governed earlier authority financing ceased to have the significance previously attached to it; for under the CBR the Authority's financial structure is based on a unitary enterprise concept and all revenues from all facilities are pooled. Individual facilities are not financed independently of the rest of the Authority. The facilities contribute their revenues for debt service on all Authority bonds according to their earning power and without regard to the amount of bonds issued for the construction of any particular facility.

While some facilities may not yield sufficient revenues to pay operating expenses and/or debt service requirements, what is of paramount concern to bondholders under the CBR is whether the total revenues of the Authority are sufficient to satisfy all of its obligations to bondholders. And in order to ensure that the abandonment of the "facility-by-facility" approach would not lead to a dilution of pledged revenues and reserves, the CBR contains covenants with the bondholders with respect to future operations and activities of the Authority and the issuance of bonds secured by a pledge of its revenues and reserves.

---

[9]The Authority covenanted, by the CBR, that no additional general and refunding, air terminal or marine terminal bonds shall be issued.

[10]As noted *infra*, although general and refunding, air and marine terminal bonds are still outstanding, the Authority has fully funded its obligations to those bondholders and the consolidated bonds presently have a first call upon all revenues of the Authority.

One of the principal protections afforded bondholders by the CBR is the so-called "1.3 test" contained in section 3.[11] The 1.3 test prohibits the issuance of new consolidated bonds unless the best one-year net revenues of all of the Port Authority's facilities equal or are greater than 1.3 times the prospective debt service for the calendar year during which the debt service of all outstanding and proposed new bonds secured by a pledge of the general reserve fund would be at a maximum.[12] The 1.3 test is thus an equation in which one component consists of the Authority's net revenues from all facilities, and the other component is the maximum annual debt service required to be paid on all Authority bonds, including the new bonds to be issued. The maximum annual debt service component is readily calculable from the requirements set forth in the resolutions authorizing the bond issues.

[1] The annual net revenue component of the equation consists of the Authority's historical net revenues from existing facilities[13] plus the estimated average annual net revenues of the facility to be acquired or constructed with the issuance

---

[11]While section 3 of the CBR provides alternate conditions for the issuance of consolidated bonds, in practice the 1.3 test described above is the least restrictive and has been the only one employed by the Port Authority since the adoption of the CBR. *Goldberg*, at 19.

[12]There is a dispute between the parties to this litigation whether a projected operating deficit of a facility to be acquired by the issuance of consolidated bonds must be deducted from net revenue for the purpose of determining whether the 1.3 test has been met. Under the terms of the CBR, if the facility to be acquired has been in operation for at least 36 months prior to the issuance of consolidated bonds, the annual operating deficit of the facility would be deducted from historical Authority net revenues in applying the 1.3 test. However, according to an Authority witness, if the facility to be acquired has not been in operation for at least 36 months, its projected operating deficit can be ignored. This view is contrary to the position of the Authority in statements made and testimony given to the Farley Committee. See *infra*, pages 152, 155–156.

[13]For this purpose the Authority is permitted to select any consecutive 12-month segment out of the 36-month period preceding the date of issuance of new consolidated bonds.

of new bonds.[14] While the 1.3 test speaks only of estimated net revenues and not of "deficits," it is evident from the purpose of the 1.3 test as well as Authority practice in arriving at historical net revenues that the estimated average annual *deficits* of a new facility must be charged against historical revenues in determining whether the 1.3 test has been met. The purpose of the 1.3 test is to protect existing bondholders against dilution of pledged revenues and reserves; if consolidated bonds are issued to acquire or construct a substantial deficit operation whose drain on Authority revenues is not included in the earning's component, the 1.3 test would be meaningless. Further, it is to be noted that in calculating historical net revenues of existing facilities the Authority arrives at one pooled figure which takes into account the deficits of such facilities.

Section 5 of the CBR directs the application of the pledged revenues to the payment of debt service upon all consolidated bonds, with the remaining balance to be paid into the consolidated bond reserve fund except to the extent necessary to be paid into the general reserve fund to maintain it at the level prescribed by statute.

Section 6 of the CBR provides that the payment of debt service upon all consolidated bonds "shall be further secured equally and ratably by the General Reserve Fund." Moneys in the general reserve fund may not be used for any purpose if there are other moneys of the Port Authority available for that purpose, unless there are sufficient funds available to the general reserve fund to pay debt service upon outstanding bonds during the ensuing 24 months, in which event such excess moneys could be used for any purpose permissible under the General Reserve Fund Act, whether or not other moneys were available for that purpose.

Section 7 of the CBR establishes a consolidated bond reserve fund into which all net revenues pledged as security

---

[14]The estimated average annual net revenue is based on estimated revenues for the first 36 months of operation of the new facility.

for consolidated bonds (after payment of debt service on all consolidated bonds and of amounts necessary to bring the general reserve fund to its statutory level) are required to be paid. The moneys in the consolidated bond reserve fund may be used only for the payment of: (a) consolidated bonds at maturity, retirement or redemption; (b) debt service upon outstanding consolidated bonds; (c) the deficit of any facility the net revenues of which were pledged as security for consolidated bonds, and (d) "any other additional purposes for which the Authority is now or may hereafter be authorized by law to expend the revenues of its facilities." The pledge of the net revenues of the Authority and of the moneys in the Consolidated bond reserve fund is subject to the right of the Authority to apply the revenues and the reserve fund as provided in section 7, and the right to issue bonds, other than consolidated bonds, secured by the reserve fund if such other bonds "are issued solely to fulfill obligations to or for the benefit of the holders of consolidated bonds and if such other bonds are also secured by a pledge of the General Reserve Fund."

Since the adoption of the CBR, capital expenditures of the Authority have been financed by the issuance of 41 series of consolidated bonds and short term notes. New facilities and improvements to existing ones have been funded without regard to the individual project's ability to generate income. This has enabled the Port Authority to undertake projects which would not be financially feasible alone but are possible because of the surplus revenues generated by its other facilities.[15] New projects undertaken since 1952 include the acquisition and/or construction of two heliports, the Brooklyn, Erie Basin, Elizabeth and Hoboken Marine Terminals, the Port Authority Trans-Hud-

---

[15]For the calendar year 1973, of the 22 facilities operated by the Authority, 14 were operated at a deficit, *i. e.*, the gross revenues were not sufficient to cover operating expenses and debt service requirements.

son (PATH) System, a bus terminal and the World Trade Center.

With respect to each series of consolidated bonds issued, the Authority adopts an authorizing resolution. Section 7 of each series resolution prohibits the issuance of any additional consolidated bonds or any other bonds to be secured by a pledge of the general reserve fund with respect to any facility or group of facilities as to which the Authority has not previously issued bonds unless

> * * * the Authority shall certify at the time of issuance its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply monies in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part.

Each consolidated bond states that it "is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority, and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes". No specific statute is mentioned in the bonds.

On December 31, 1970 the Authority placed in trust with the First National City Bank, as trustee, $60,749,000 from the Authority's special reserve fund, air terminal reserve fund and marine terminal reserve fund to secure fully, unconditionally and absolutely the Authority's obligation to provide for the redemption as scheduled and the payment of interest until redemption on the Authority's outstanding

general and refunding bonds, air terminal bonds and marine terminal bonds. After the establishment and during the maintenance of these trusts no further payments are required to be made into such reserve funds. As a result the pledge of Authority revenues and reserves to secure repayment of consolidated bonds is no longer subject to the prior lien in favor of the earlier series of bonds. The maintenance of the reserve funds in trust permits the application of all net revenues and reserves of the Authority to the payment of the consolidated bonds.

As of December 31, 1974 the issued and outstanding consolidated bonds of the Authority totaled $1,668,584,000,[16] the general reserve fund contained $173,487,000 and the consolidated bond reserve fund $46,800,000. Gross and net operating revenues for 1974 were $410,412,000 and $156,118,000, respectively. After debt service and sinking fund requirements were met the Authority had available for transfer to its reserve funds $67,018,000, resulting in a net increase in its reserves of $18,293,000 for the year.[17]

The Legislative History of the 1962 Covenant.

So far as the record reveals, the history of New Jersey's involvement with mass transit begins with the enactment of *chapter* 104 of the *Laws of* 1922. The Legislature there established the North Jersey Transit Commission[18] to study

[16]This total includes $200,000,000 of bonds issued as the 40th and 41st series following the prospective repeal legislation of 1973, which are not "affected bonds" and hence not covered by the terms of the 1962 covenant.

[17]As at December 31, 1974 the Authority owed to various banks on short term loans $255,000,000. During 1974 the banks were repaid $40,000,000, plus interest, from the consolidated bond reserve fund, which accounts for the difference between the amount available for transfer to the reserve fund and the actual increase in the reserve fund balance at the end of the year.

[18]The preamble to the North Jersey Transit Commission Act of 1922, see *infra*, notes that the Port Authority Comprehensive Plan

and report upon plans for providing a comprehensive scheme of rapid passenger transit[19] between northern New Jersey communities and New York City. In its 1925 and 1926 reports this Commission noted both the urgent need for and complexity of a rapid transit plan for the northern New Jersey area which would furnish direct access to the midtown New York City area.

In 1927 the New Jersey Legislature authorized and directed the Port Authority to make plans to provide for rapid passenger transit between the states and within the Port District. Similar legislation was adopted in New York but was vetoed by Governor Alfred E. Smith, who in his veto message noted his unwillingness to have the Port Authority diverted from its principal objective of solving the freight distribution problems within the District. Governor Smith's veto to all intents and purposes ended any legislative effort to involve the Port Authority in an active role in commuter transit for the next 30 years.[20]

The years between 1928 and 1958 were devoted to largely fruitless efforts by numerous groups, agencies and commissions to devise a solution for mass transit within the metropolitan New York-New Jersey area. No useful purpose would be served in cataloging their failures — which were not failures of purpose, effort or imagination, but the failure to find the source of funds required to implement any plan. In the meantime the financial position of existing com-

---

"does not include the problem of passenger traffic in the territory covered by said port development plan." *L.* 1922, *c.* 104.

[19]For the purpose of this opinion the term "rapid passenger transit" has reference to transportation of passengers by railroad and will be used interchangeably with the terms "commuter transit" and "mass transit," although the latter terms conceivably could involve means of conveyance other than by railroad.

[20]In 1936 the states requested the Port Authority to report on interstate and suburban passenger transportation. *Jt. Res. No. Laws* of 1936. The Port Authority filed its report in 1937, which disclaimed its financial ability to undertake a solution to the transit problems of the District.

muter transit facilities continued to deteriorate. By 1955 the Hudson and Manhattan Railroad had filed a petition for reorganization under the federal bankruptcy laws,[21] and the private railroads were petitioning the Interstate Commerce Commission for permission to abandon ferry service across the Hudson and to discontinue various passenger services because of substantial operating deficits.[22]

In 1958 the Metropolitan Rapid Transit Commission[23] issued a report to the states of New Jersey and New York setting forth a proposal for the construction of a trans-Hudson loop commuter transit system at an estimated capital cost of almost $500,000,000. The report noted the need to coordinate and to achieve a balance between highway and rail transportation systems. The Commission pointed out:

> That balance does not exist today. The automobile drivers and the bus operators make use of roadways, tunnels, bridges and central area terminals which are tax free and are either publicly maintained or publicly developed out of user taxes and user fees. Private railroad companies must raise the capital (and pay the interest on it) to build their rights-of-way and provide the operating facilities, and must maintain them and pay taxes on them. Since 1930, billions of public dollars have been spent, and are still being spent, by federal, state and local governments in the development of highways, bridges and other facilities for vehicular traffic, but no public funds whatever have been spent during the same period in promoting or improving

---

[21] As of this date the four private companies which operate commuter railroad services in New Jersey are all being reorganized under federal bankruptcy laws.

[22] By 1959 the four commuter railroads operating in northern New Jersey sustained a total passenger operating deficit of $58,300,000. The New York commuter railroads had an aggregate deficit from commuter operations estimated at between $10,000,000 and $15,000,000 for 1960. The Staten Island Ferry operated at a loss of about $6,000,000 for the year, and the New York City Transit System had an operating deficit of $20,000,000, exclusive of debt service charges of $87,000,000.

[23] The New Jersey Metropolitan Rapid Transit Commission was created pursuant to *L.* 1952, *c.* 194 and was consolidated with its New York counterpart by *L.* 1954, *c.* 44.

mass transportation by rail between the New York and New Jersey portions of the Metropolitan Area.

The imbalance has resulted in a constant and relentless deterioration of suburban rail service. Ferries are being abandoned, train service is reduced, petitions are filed for abandonments, cars are getting older without being replaced. Repeated increases in fares in an effort to match rising costs and to establish earnings which can be used to improve the properties are resisted by public regulatory bodies. The result is more constriction of service by railroads, with consequent further congestion of highway facilities. One very grave consequence has been the creation of a stupendous cycle of traffic congestion in the streets, constantly calling for still further enormous expenditure of public funds for still further vehicular traffic.

Obviously, the people and the governments within this New York-New Jersey Metropolitan area are now face to face with this looming crisis, and can no longer avoid it by conveniently looking the other way.

Capital for the construction of the trans-Hudson loop must be raised by a public agency and bonds issued by it must have some measure of public guarantee to be saleable. Revenue bonds for transit purposes have a bad reputation in the bond market because of the financial history and condition of transit systems. While it would be desirable that the users of the loop would pay through fares the full capital and operating cost all experience conclusively demonstrates otherwise. On the other hand, the public interest requires that the fares be established at a level to foster maximum usage and utility of the system and provisions must be made for possible deficits. In addition, it must be recognized that capital for construction and equipment cannot be secured merely by evidence that revenues will equal costs.

A study which had been prepared for the Commission on the financial structure of the proposed commuter transit system had suggested that "financing would not be available from any of the existing public authorities since this action would in some cases impair the obligations of the authorities' covenants with bondholders and would seriously affect the ability of the authorities to discharge the responsibilities for which they were established." Nevertheless, during the 1958 session of the New Jersey Legislature a bill was introduced (Assembly Bill No. 16) which provided that the Port Authority take over and financially develop, improve and operate interstate passenger rail transportation between

New Jersey and New York. The Port Authority submitted a statement to the Legislature in response to this bill in which it said, among other things:

> This opposition is based on the conclusion of the Commissioners that: (1) It is legally, financially and contractually impossible for the Port Authority to assume the railroads' increasingly heavy deficits from commuter operations or the cost of developing a new and comprehensive rail rapid transit system; and (2) The assumption of rail transit deficits by the Port Authority, the self-supporting agency of the two States, would immediately cripple and very quickly destroy the program of the two States now under way for the continued development of their essential public port and harbor facilities, airports, and interstate arterial systems.
>
> * * * * * * * *
>
> In addition to the General Reserve Fund, various special reserve funds have been created as a result of contractual commitments with bondholders in support of the various issues of Port Authority bonds. As in the case of the General Reserve Fund, the Authority may apply moneys in the Special Reserve Funds for purposes relating only to those of its bonds secured by a pledge of the General Reserve Fund, including purposes relating to facilities financed by such General Reserve Fund Bonds.
>
> All Port Authority revenues not applied to operation and maintenance and debt service *must* be paid into one or another of these reserve funds. There are no excess revenues which are free of this contractual commitment to bondholders.[24] [Emphasis supplied]

In its statement to the 1958 Legislature the Authority suggested that even if it were possible to ignore legal restrictions on the use of Authority net revenues to finance commuter rail deficits, such a course of action would impair the Authority's credit standing and adversely affect the ability of the Authority to carry out its then existing programs. To reinforce this view the Authority solicited and included in its statement similar expressions of opinion from members of the investment banking community.

In January 1959 a joint report was issued on Assembly Bill No. 16 by the New Jersey Assembly Committees on

---

[24]In view of recent developments it should be noted that in its statement the Authority also opposed an increase in tolls for the Hudson River crossing since this would constitute an "unfair tax" upon motorists to subsidize rail transit.

Highways, Transportation and Public Utilities, and on Federal and Interstate Transportation. This report concluded that the Port Authority could not be called upon to undertake the entire rail passenger transit obligation because (1) no one could estimate the size of the deficit operation the Authority would be undertaking, and (2) while the Authority could absorb some deficit, its operations, taken as a whole, must be self-supporting.

Pressures for financial aid to and Port Authority involvement in commuter transit continued to mount, and in 1960 the New Jersey Senate created a committee (known as the Farley Committee) to study the financial structure and operations of the Authority. One of the principal subjects investigated by the Farley Committee was the Authority's role in commuter transit. At the time the Committee's hearings commenced its immediate concern was to find a means to continue the operations of the bankrupt Hudson & Manhattan Railroad (H & M). The bankruptcy reorganization proceedings involving the H & M had reached the point where, in 1959, the District Court had left the H & M with sufficient cash for operations to continue for only two years. See *In re Hudson & Manhattan Railroad Co.,* 174 *F. Supp.* 148 (S. D. N. Y. 1959), aff'd *sub nom. Spitzer v. Stichman,* 278 *F.* 2d 402 (2 Cir. 1960). The Authority's Executive Director, Austin Tobin, testified before the committee concerning his discussions with New Jersey Highway Commissioner Dwight Palmer to have the Port Authority acquire and operate the H & M. Tobin testified in September 1960:

> Faced with these legal and contractual commitments [to the Authority's bondholders], which are the whole basis of the Authority's credit, Commissioner Palmer and the Port Authority have been examining, beginning with our initial exploration of the possibility on last February 15, whether bi-state legislation could be fashioned under which the Authority might even acquire and finance the bankrupt and deficit-ridden Hudson & Manhattan properties and finance its modernization by the Port Authority as a new Port Authority facility.

> In other words, could any legal and financial plan be worked out that would meet the foregoing contracts with investors and, from the standpoint of maintaining the Port Authority's credit, guarantee that the Authority would not thereupon become generally or further involved in the deficits of the commuter railroads, both in New York and in New Jersey? Obviously, unless such a covenant could be established no Port Authority bonds could be sold either for the acquisition of the Hudson & Manhattan properties or for any other Port Authority purpose.
>
> Thus the core of the problem is whether or not the two States could, to use a phrase about it, 'build a statutory fence around' the Hudson & Manhattan by guaranteeing to investors that the Authority would not and could not become involved in the large and increasing deficits of the New York and New Jersey commuter railroads, which with the New York subways total a deficit of something like $150,000,000 a year.

In January 1961 Commissioner Palmer appeared before the Farley Committee and expressed his conclusion that the Port Authority should purchase and operate the H & M provided limitations were placed upon the Authority's role in mass transit. On this subject he testified:

> The Port Authority in my opinion must make money and accumulate reserves for the rainy day if it is to be equipped to meet the needs of our two states of New York and New Jersey. It does not have general taxing powers. Its only taxes are the tolls it collects from the users of its facilities. Its shareholders are the public, you and I, and the institutions that buy the bonds. Since the cost of financing often determines the feasibility of a project it stands to reason that you and I get more for our toll dollar in the way of modern and safe facilities if we make certain that the credit rating of the Authority remains intact.
>
> Now most of us realize that the matter of credit is not an exact science. The credit of an organization depends on quite a few factors; past performance, efficient management and calibre of personnel and markets for the product the institution has to sell; and last but not least — what investors think of the operation as a financial risk. It is, in the final analysis, the practical assessment of being repaid money that they lend to it.

Relating specifically to what ultimately became the 1962 covenant, Senator Wayne Dumont questioned Commissioner Palmer as follows:

Q. Commissioner, when the Port Authority made its proposal in September, at our hearings then, to take over the Hudson & Manhattan Tube, they surrounded their proposal with certain restrictions which, so far as I could tell were designed to eliminate any real obligation on the part of the Port Authority beyond taking over the Hudson & Manhattan Tubes, at least so far as the railroad field was concerned. Do you consider those restrictions that they surrounded this proposal with as reasonable ones? A. Yes, I do. And I have so stated in my proposal and I do it purely on the basis of what experience I may have had in the field of finance and industry, and of what we are hoping to obtain and acquire in the future in the expansion of facilities that the Port can supply.

* * * * * * *

And it seems impossible, from all of my direct — and not through any other channels — direct contacts, to observe that money could be loaned for even the acquisition of the H&M in the event there was not some assurance that this just wasn't one bite of the cherry and that further transportation business was all to be pulled together. I think it's simply a question of whether the investor says yes or no, and at the present time my observation is the investor says no unless he has that limitation.

The following day the Port Authority's Vice-Chairman, James C. Kellogg, III, testified concerning the Authority's H & M plans. He emphasized that only by adopting what became the 1962 covenant could the Port Authority acquire and rehabilitate the H & M.

There is, of course, no possibility whatsoever that either the Port Authority or any one else could operate the H&M on a self-supporting basis. The bankrupt H&M has not paid a dividend since 1932; it has not been able to meet the interest on its bonded indebtedness and has been in receivership since 1954.

* * * * * * *

On this estimate of the H&M losses [$5 million annually], and if we are able to satisfy prospective investors by statutory assurances that this proposal will not involve the Authority's General Reserve Fund in any other or further commuter deficit operations, we believe we can conscientiously certify, as we must under our indentures, that this financing will not impair the Port Authority's credit. On the other hand, if we are not in a position to cite such statutory assurances to those from whom we will have to borrow the money, and therefore, we are not in a position to make such a certification, we obviously would not be in a position to borrow money for the acquisition, let alone the improvement, of the H&M.

* * * * * * *

All Port Authority revenues not applied to operation and maintenance and debt service *must* be paid into one or another of these

reserve funds. There are no excess revenues which are free from this contractual commitment to bondholders.

The most important pledges that the Port Authority has made to its bondholders are those relating to the issuance of bonds for new projects. These pledges were necessary since otherwise the security could be diluted, not only through the raiding of revenues and reserves, but just as disastrously by the unlimited issuance of bonds which have such revenues and reserves as their primary source of repayment.

It is because of this that the Port Authority had to covenant with its bondholders not to issue Consolidated Bonds supported by the General Reserve Fund for any new facility unless it can be demonstrated that, *including the new facility*, net revenues will be sufficient to cover by at least 1.3 times the maximum interest and principal payments due in any future year. Furthermore, bonds for a new faciilty cannot be issued with a pledge of the General Reserve Fund unless the Port Authority Commissioners certify that the issuance of the new bonds will not materially impair the sound credit standing of the Authority, the investment status of the Authority's bonds, or the ability of the Authority to fulfill its commitments and undertakings. Such protections for investors under open-end revenue bond issues are not uncommon.

Applied to the H&M proposal, I would like to make it clear that the question of whether or not we can borrow the $83,500,000 which is required, is not simply a question of whether or not we would have to pay a higher rate of interest on these funds. We can only submit to you the unanimous view of the Commissioners of the Port Authority that there is no possibility whatsoever of borrowing the money at all without a statutory assurance to investors that any future Port Authority responsibilities in the field of commuter rail transport over and above the present and existing interstate Hudson and Manhattan railroad system will not involve a pledge of the Port Authority's General Reserve Fund.

I say to you as a New Jersey Commissioner, and with all the sincerity that I can command, that there is nothing arbitrary or doctrinaire about this conclusion. It simply represents the Port Authority's credit. My business is investment financing and I say to you gentlemen that I could not sell a single Port Authority bond without such an assurance. If my responsibility were on the other side of the table, I would not buy a Port Authority bond that did not contain such an assurance. [Emphasis supplied]

Following Kellogg's prepared statement he was questioned by Senators Farley and Cowgill as to the binding effect

which the proposed covenant legislation could have on a subsequent legislature. The questioning proceeded as follows:

BY SENATOR FARLEY:

Q. Mr. Kellogg, I noticed in the latter part of your statement, you said you must be given assurance by the Legislature that if they directed the Port to proceed to purchase this property, they must make a pledge to the bondholders there be no further projects involving rail. Now I appreciate that if the Legislature directs you to enter into a contract involving the issuance of bonds, there will be no impairment of obligations of contract, but I must call to your attention and the members of your Commission that one Legislature cannot bind a subsequent Legislature involving policy. If, perchance, may I illustrate — ten, fifteen, twenty years from now the respective legislatures of New York and New Jersey importune your Port Authority Commission to do something in addition involving public service, one legislature cannot bind another involving policy. Do you follow me? A. I do.

Q. I appreciate the legal end of it involving obligation of contract, but in your statement that you be given assurance that no further services should be required of you involving rail forever hereafter — and how this legislature could bind a subsequent legislature I do not know. A. We'd have to say that to the bondholders, the ones that were going to purchase the new bonds, that we as Commissioners believe that this would not endanger the 1.3 ratio.

* * * * * * * *

BY SENATOR COWGILL:

Q. I want to clear one thing up. I got a little confused there for a minute on that policy business — in the event that the H&M were acquired on the basis of statutes passed by New Jersey and New York, they would not be called upon, that is, the Port Authority would not be called upon, to go into any further commuter problems of other roads. If bonds were issued under such legislation, you would not be able to issue any further bonds for anything else unless you were willing to certify that it would not — A. That's correct. It wouldn't say that the bonds couldn't be issued with a state guarantee later on for something else or something of that type, freight or anything else.

Q. It seems to me on that basis, that you enter a contract on the basis of legislation passed, that contract is going to stand and some later legislature is not going to be able to change it. A. That's right.

SENATOR FARLEY:

My question, Senator, was — and I appreciate we cannot impair obligations: In effect, would any commitment with the present legis-

lature estop or attempt to estop any legislation involving public needs in the future? [No answer was given at this point].

Commissioner Clancy of the Port Authority followed Commissioner Kellogg to the stand and the following colloquy took place directed to the same point:

SENATOR FARLEY:

I say to you as a commissioner representing New Jersey we too have a responsibility of making sure that this is done thoroughly, intelligently and in a way that would be feasible and practical. It was testified today by Mr. Kellogg that the Port should not be bound by any other demand from the State Legislature relative to rail service. I pointed out to him — and may I say to you as a lawyer — we well appreciate that any direction we give you by enacting legislation, we could not impair any obligation such as contracts of bond issues. Likewise, you as a lawyer know that one legislature cannot bind the other involving policy five, ten, or twenty years hence. A. I appreciate that.

Q. So that when this Committee makes its report, we are not exonerating the Port from any responsibility for any demand for future public service by either the New York or New Jersey legislature. I want you to appreciate that fact. A. I appreciate that fully and I am aware of the fact if a situation such as that would arise in the future, that would be a matter that we would have to discuss on its own merits with a future Governor and future legislature.

Q. That's right.

* * * * * * * *

MR. TOBIN:

May I say something?

SENATOR FARLEY:

I want to call you, Mr. Tobin, relative to this situation. If you want to interject something at this time, we will be very happy to have you do so.

MR. TOBIN:

You might want to know that this legislative assurance, as Commissioner Kellogg pointed out, would only apply to future commuter

operations and only limits the use of the pledge of the general reserve fund. It only limits the pledge of the general reserve fund, nothing else. It would not typically bar Port Authority participation where some other scheme of guarantee of the bonds or something like that —

SENATOR FARLEY:

That would have to depend on its own merit or demerit and then be considered. But I call to your attention as a Commissioner the problem of the Legislature.

I am aware of the problem, but, of course, the action that is taken now with reference to the Hudson and Manhattan would not necessarily of itself bar future participation in the problem generally. It would, however, not be possible if that future participation involved any impairment of this reserve fund.

While the Farley Committee hearings were in progress the New York Legislature adopted legislation directing the Port Authority to acquire and operate the H&M, *Laws of N. Y.* 1961, *c.* 312, without any covenant against or limitation upon future Authority involvement in passenger rail transit. This legislation was not acceptable to the New Jersey Legislature because "the absence of such a covenant * * * endangered the future utility of the Port Authority to the two States." *Report of Senate Investigation Committee Under Senate Resolution Number 7 of the Year 1961,* at 23. The Committee's report, which was issued in 1963, notes that it sponsored the 1962 covenant legislation so as to limit

*** * * by a constitutionally-protected statutory covenant with Port Authority bondholders the extent to which the Port Authority revenues and reserves pledged to such bondholders can in the future be applied to the deficits of possible future Port Authority passenger railroad facilities beyond the original Hudson & Manhattan Railroad system. [*Id.* at 24]**

The 1962 covenant legislation was passed unanimously by both houses of the New Jersey Legislature on February 13, 1962 and Governor Hughes signed the bill on the same day. The New York Legislature followed suit on March 7, 1962, *Laws of N. Y.* 1962, *c.* 209, and the covenant legislation be-

came effective upon Governor Rockefeller's signature on March 27, 1962.

L. 1962, *c.* 8, authorized the Port Authority to proceed with the acquisition, construction and operation of a port development project which would include the World Trade Center and the H&M. *N. J. S. A.* 32:1–35.52. For this purpose the Authority was authorized to issue bonds for the project secured by a pledge of the general reserve fund. *N. J. S. A.* 32:1–35.53. The preamble of the act reflects the following legislative findings relevant to the H&M acquisition:

The States of New York and New Jersey hereby find and determine:

(1) that the transportation of persons to, from and within the Port of New York and the flow of foreign and domestic cargoes to, from and through the Port of New York are vital and essential to the preservation of the economic well-being of the northern New Jersey-New York metropolitan area;

(2) that in order to preserve the northern New Jersey-New York metropolitan area from economic deterioration, adequate facilities for the transportation of persons must be provided, preserved and maintained and that rail services are and will remain of extreme importance to such transportation of persons;

(3) that the interurban electric railway now or heretofore operated by the Hudson & Manhattan Railroad Company is an essential railroad facility serving the northern New Jersey-New York metropolitan area, that its physical plant is in a severely deteriorated condition, and that it is in extreme financial condition;

(4) that the immediate need for the maintenance and development of adequate railroad facilities for the transportation of persons between northern New Jersey and New York would be met by the acquisition, rehabilitation and operation of the said Hudson & Manhattan interurban electric railway by a public agency, and improvement and extensions of the rail transit lines of said railway to permit transfer of its passengers to and from other transportation facilities and in the provision of transfer facilities at the points of such transfers;

* * * * * * * *

(8) that the Port of New York Authority (hereinafter called the port authority), which was created by agreement of the 2 States as their joint agent for the development of the transportation and terminal facilities and other facilities of commerce of the port district and for the promotion and protection of the commerce of their port, is the proper agency to act in their behalf (either directly or by or through wholly-owned subsidiary corporations) to effectuate, as
